transformed his life and why they have the power to speak to people of all backgrounds What is the value of a liberal education Traditionally characterized by a rigorous engagement with the classics of Western thought and literature this approach to education is all but extinct in American universities replaced by flexible distribution requirements and ever narrower academic specialization Many academics attack the very idea of a Western canon as chauvinistic while the general public increasingly doubts the value of the humanities In *Rescuing Socrates* Dominican born American academic Roosevelt Mont s tells the story of how a liberal education transformed his life and offers an intimate account of the relevance of the Great Books today especially to members of historically marginalized communities Mont s emigrated from the Dominican Republic to Queens New York when he was twelve and encountered the Western classics as an undergraduate in Columbia University s renowned Core Curriculum one of America s last remaining Great Books programs The experience changed his life and determined his career he went on to earn a PhD in English and comparative literature serve as director of Columbia s Center for the Core Curriculum and start a Great Books program for low income high school students who aspire to be the first in their families to attend college Weaving together memoir and literary reflection *Rescuing Socrates* describes how four authors Plato Augustine Freud and Gandhi had a profound impact on Mont s s life In doing so the book drives home what it s like to experience a liberal education and why it can still remake lives

The Cult of Smart Fredrik deBoer,2020-08-04 Named one of *Vulture* s Top 10 Best Books of 2020 Leftist firebrand Fredrik deBoer exposes the lie at the heart of our educational system and demands top to bottom reform Everyone agrees that education is the key to creating a more just and equal world and that our schools are broken and failing Proposed reforms variously target incompetent teachers corrupt union practices or outdated curricula but no one acknowledges a scientifically proven fact that we all understand intuitively Academic potential varies between individuals and cannot be dramatically improved In *The Cult of Smart* educator and outspoken leftist Fredrik deBoer exposes this omission as the central flaw of our entire society which has created and perpetuated an unjust class structure based on intellectual ability Since cognitive talent varies from person to person our education system can never create equal opportunity for all Instead it teaches our children that hierarchy and competition are natural and that human value should be based on intelligence These ideas are counter to everything that the left believes but until they acknowledge the existence of individual cognitive differences progressives remain complicit in keeping the status quo in place This passionate voice driven manifesto demands that we embrace a new goal for education equality of outcomes We must create a world that has a place for everyone not just the academically talented But we ll never achieve this dream until the Cult of Smart is destroyed
