**Nonprofit Governance** Chris Cornforth, William A. Brown, 2013-07-04 The current fashion for rolling back the state has seen the nonprofit or third sector playing an increasing role in what were previously the heartlands of the public sphere The growing significance of the sector and its increasing reliance on public funds mean it has also attracted increased scrutiny From outside the sector concerns have been raised about the accountability and performance of nonprofit organizations

From within the sector there has been considerable debate about whether the increased reliance on government contracts is in danger of undermining the sector's independence. As a result, the spotlight has fallen on governance arrangements and whether they are adequate to ensure that nonprofit organizations are effective and accountable for their actions and able to retain their independence. This collection offers a comprehensive assessment of research on the governance of nonprofit organizations. Nonprofit governance research has been dominated by the study of boards of unitary organizations and has paid insufficient attention to the multi-level nature of governance relationships and dynamics and the contribution of actors other than board members to governance processes. Drawing on the research of leading scholars in the US, UK, Canada, and Australia, this book presents new perspectives on nonprofit governance which help to overcome these weaknesses. Written in an accessible manner, the book will be of value to scholars, researchers, students, reflective practitioners, and governance consultants and advisers.

Laura S. Hamilton, Brian M. Stecher, Stephen P. Klein, 2002-07-31. Do these high stakes tests measure student achievement accurately? How can policymakers and educators attach the right consequences to the results of these tests? And what kinds of tradeoffs do these testing policies introduce? This book responds to the growing emphasis on high stakes testing and offers recommendations for more effective test-based accountability systems.

**The Columbia Guide to Social Work Writing** Warren J. Green, Barbara Levy Simon, 2012. Social work practitioners write for a variety of publications and they are expected to show fluency in a number of related fields. Whether the target is a course instructor, scholarly journal, fellowship organization, or general news outlet, social workers must be clear, persuasive, and comprehensive in their writing, especially on provocative subjects. This first of its kind guide features top scholars and educators providing a much needed introduction to social work writing and scholarship. Foregrounding the process of social work writing, the coeditors particularly emphasize how to think about and approach one's subject in a productive manner. The guide begins with an overview of social work writing from the 1880s to the present and then follows with ideal strategies for academic paper writing, social work journal writing, and social work research writing. A section on applied professional writing addresses student composition, in-field education writing, for and about clinical practice, the effective communication of policy information to diverse audiences, program and proposal development, advocacy, and administrative writing. The concluding section focuses on specific fields of practice, including writing on child and family welfare, contemporary social issues, aging, and intervention in global contexts. Grounding their essays in systematic observations, induction, and deduction, and a wealth of real-world examples, the contributors describe the conceptualization, development, and presentation of social work writing in ways that better secure its power and relevance.
