Transparent Lobbying and Democracy Šárka Laboutková, Vít Šimral, Petr Vymětal, 2020-02-04. The authors come up with some innovative tools namely the Catalogue of transparent lobbying. They look at and evaluate the impact on both key stakeholders: lobbyists and targets of lobbying; monitoring of lobbying activities and sanctioning for breaches of rules. This tool holds out benchmarking capacity of sound framework for understanding of lobbying in the context of democracy: legitimacy of decision making and accountability. David Ondrka, member of global Board of Transparency International, head of Transparency International Czech Republic. Transparent Lobbying and Democracy provides a comprehensive view into the phenomenon of lobbying. As a well established scientist specializing in democracy, civil society and the public sphere, I see it as a useful and enriching contribution to the debate on lobbying: its necessary transparency and its role in the democratization process. This book has the potential to reach an international audience of experts and interested lay persons and both complement and compete with publications on similar issues. Karel B. Müller, University of Economics in Prague, Czech Republic. This book deals with the current as yet unsolved problem of transparency of lobbying. In the current theories and prevalent models that deal with lobbying activities, there is no reflection of the degree of transparency of lobbying, mainly due to the unclear distinction between corruption, lobbying in general and transparent lobbying. This book provides a perspective on transparency in lobbying in a comprehensive and structured manner. It delivers an interdisciplinary approach to the topic and creates a methodology for assessing the transparency of lobbying, its role in the democratization process and a methodology for evaluating the main consequences of transparency. The new approach is applied to assess lobbying regulations in the countries of Central Eastern Europe and shows a method for how lobbying in other regions of the world may also be assessed. *Media Accountability in the Era of Post-truth Politics* Tobias Eberwein, Susanne Fengler, Matthias Karmasin, 2019. Bringing together both leading international scholars and emerging academic talent, *Media Accountability in the Era of Post Truth Politics* maps the current state of media accountability in Europe and provides fresh perspectives for future developments in media and communication fields. As the integrity of the international media landscape is challenged by far reaching transformations and the rise of fake news, the need for a functional system of media regulation is greater than ever. This book addresses the pressing need to re-evaluate and redefine the notion of accountability in the fast changing field of journalism and information provision. Using comparative research and empirical data, the book's case studies address the notion of media accountability from various perspectives, considering political and societal change, economic, organisational and technological factors and the changing role of media audiences. By collecting and juxtaposing these studies, the book provides a new discussion for the old question of how we can safeguard free and responsible media in Europe, a question that seems more urgent than ever. Media

Accountability in the Era of Post Truth Politics is an essential read for students and researchers in journalism media and communication studies

Nonprofit Governance Chris Cornforth, William A. Brown, 2013-07-04 The current fashion for rolling back the state has seen the nonprofit or third sector playing an increasing role in what were previously the heartlands of the public sphere The growing significance of the sector and its increasing reliance on public funds mean it has also attracted increased scrutiny From outside the sector concerns have been raised about the accountability and performance of nonprofit organizations

From within the sector there has been considerable debate about whether the increased reliance on government contracts is in danger of undermining the sector's independence. As a result, the spotlight has fallen on governance arrangements and whether they are adequate to ensure that nonprofit organizations are effective and accountable for their actions and able to retain their independence. This collection offers a comprehensive assessment of research on the governance of nonprofit organizations. Nonprofit governance research has been dominated by the study of boards of unitary organizations and has paid insufficient attention to the multi-level nature of governance relationships and dynamics and the contribution of actors other than board members to governance processes. Drawing on the research of leading scholars in the US, UK, Canada, and Australia, this book presents new perspectives on nonprofit governance which help to overcome these weaknesses. Written in an accessible manner, the book will be of value to scholars, researchers, students, reflective practitioners, and governance consultants and advisers.

Making Sense of Test-Based Accountability in Education

Laura S. Hamilton, Brian M. Stecher, Stephen P. Klein, 2002-07-31. Test-based accountability systems that attach high stakes to standardized test results have raised a number of issues on educational assessment and accountability. Do these high-stakes tests measure student achievement accurately? How can policymakers and educators attach the right consequences to the results of these tests? And what kinds of tradeoffs do these testing policies introduce? This book responds to the growing emphasis on high-stakes testing and offers recommendations for more effective test-based accountability systems.

The Columbia Guide to Social Work Writing Warren J. Green, Barbara Levy Simon, 2012. Social work practitioners write for a variety of publications and they are expected to show fluency in a number of related fields. Whether the target is a course instructor, scholarly journal, fellowship organization, or general news outlet, social workers must be clear, persuasive, and comprehensive in their writing, especially on provocative subjects. This first-of-its-kind guide features top scholars and educators providing a much-needed introduction to social work writing and scholarship. Foregrounding the process of social work writing, the coeditors particularly emphasize how to think about and approach one's subject in a productive manner. The guide begins with an overview of social work writing from the 1880s to the present and then follows with ideal strategies for academic paper writing, social work journal writing, and social work research writing. A section on applied professional writing addresses student composition in field education, writing for and about clinical practice, the effective communication of policy information to diverse audiences, program and proposal development, advocacy, and administrative writing. The concluding section focuses on specific fields of practice, including writing on child and family welfare, contemporary social issues, aging, and intervention in global contexts. Grounding their essays in systematic observations, induction, and deduction, and a wealth of real-world examples, the contributors describe the conceptualization, development, and presentation of social work writing in ways that better secure its power and relevance.
