The Public School Advantage Christopher A. Lubienski, Sarah Theule Lubienski, 2013-11-07 Nearly the whole of America's partisan politics centers on a single question Can markets solve our social problems And for years this question has played out ferociously in the debates about how we should educate our children From the growth of vouchers and charter schools to the implementation of No Child Left Behind policy makers have increasingly turned to market based models to help improve our schools believing that private institutions because they are competitively driven are better than public ones With *The Public School Advantage* Christopher A and Sarah Theule Lubienski offer powerful evidence to undercut this belief showing that public schools in fact outperform private ones For decades research showing that students at private schools perform better than students at public ones has been used to promote the benefits of the private sector in education including vouchers and charter schools but much of these data are now nearly half a century old Drawing on two recent large scale and nationally representative databases the Lubienskis show that any benefit seen in private school performance now is more than explained by demographics Private schools have higher scores not because they are better institutions but because their students largely come from more privileged backgrounds that offer greater educational support After correcting for demographics the Lubienskis go on to show that gains in student achievement at public schools are at least as great and often greater than those at private ones Even more surprising they show that the very mechanism that market based reformers champion autonomy may be the crucial factor that prevents private schools from performing better Alternatively those practices that these reformers castigate such as teacher certification and professional reforms of curriculum and instruction turn out to have a significant effect on school improvement Despite our politics we all agree on the fundamental fact education deserves our utmost care *The Public School Advantage* offers exactly that By examining schools within the diversity of populations in which they actually operate it provides not ideologies but facts And the facts say it clearly education is better off when provided for the public by the public

The Cigarette Century Allan M. Brandt, 2009-01-06 The invention of mass marketing led to cigarettes being emblazoned in advertising and film deeply tied to modern notions of glamour and sex appeal It is hard to

find a photo of Humphrey Bogart or Lauren Bacall without a cigarette No product has been so heavily promoted or has become so deeply entrenched in American consciousness And no product has received such sustained scientific scrutiny The development of new medical knowledge demonstrating the dire harms of smoking ultimately shaped the evolution of evidence based medicine In response the tobacco industry engineered a campaign of scientific disinformation seeking to delay disrupt and suppress these studies Using a massive archive of previously secret documents historian Allan Brandt shows how the industry pioneered these campaigns particularly using special interest lobbying and largesse to elude regulation But even as the cultural dominance of the cigarette has waned and consumption has fallen dramatically in the U S Big Tobacco remains securely positioned to expand into new global markets The implications for the future are vast 100 million people died of smoking related diseases in the 20th century in the next 100 years we expect 1 billion deaths worldwide
