   **Accounting Information Systems** Robert Hurt,Robert L. Hurt,2015-02-16 Accounting Information Systems Basic Concepts and Current Issues Third Edition provides an interdisciplinary presentation of the fundamental accounting topics and information technology of AIS It is written in a manner intended to develop professional judgment and critical thinking skills so students are prepared to be successful and effectively communicate with accountants and general managers whether their careers take them into public accounting the corporate world governmental and not for profit accounting or another practice      Advanced Accounting Debra C. Jeter,Paul K. Chaney,2019-01-30 Advanced Accounting delivers an in depth comprehensive introduction to advanced accounting theory and application using actual business examples and relevant news stories to demonstrate how core principles translate into real world business scenarios Clearly defined and logically organized Learning Objectives aid in student comprehension while highlighted Related Concepts illustrate how individual concepts fit into the larger picture Short answer questions throughout the chapter allow students to test their knowledge before reaching the more in depth end of chapter questions promoting a deeper understanding of both technical and conceptual aspects of the field Written by active accounting researchers this text brings clarity and flexibility to the central ideas underlying business combinations consolidated financial statements foreign currency transactions partnerships non profit accounting and more This new Seventh Edition has been updated to reflect the latest changes to FASB and GASB standards allowing students to build a skill set based on up to date practices With a student oriented pedagogy designed to enhance comprehension promote engagement and build real world understanding this user friendly book provides an essential foundation in current advanced accounting methods and standards      **Accounting Information Systems** Cynthia D. Heagy,Constance M. Lehmann,2010-04-15 This textbook is intended to meet the needs of a first course in accounting information systems at either the undergraduate or graduate level It may also be used as a review text in second or subsequent courses in this area A primary objective in writing the seventh edition of the text was to present AIS material that would make students more marketable in today s accounting environment Recognizing that over 90 percent of accounting systems are licensed rather than internally custom developed and that the current market demand is for accounting graduates who can install operate and audit such systems this text represents a new paradigm In contrast to traditional accounting systems textbooks that assume an organization will develop its own accounting system and therefore emphasize systems development this textbook gives students the theoretical foundation and skills they will need to conduct a requirements analysis search for a commercial solution and successfully implement the software package selected In addition to learning the essential AIS concepts you will see much discussion and many examples of commercial accounting systems software as it is designed and as it should be designed Another objective in writing this edition was to make the material student friendly Therefore the authors took great care in directing their words to the students Recognizing that this

is their first introduction to accounting systems clear definitions of terms were included and numerous examples and illustrations were incorporated to explain the material The book consists of fifteen chapters The first fourteen chapters provide the theoretical and practical foundation for the final chapter on selecting and implementing AIS software The learning experience will be optimized if all fifteen chapters are covered **Accounting: Information for Business Decisions** Billie Cunningham,Loren A.
