CHAPTER 2 INTRODUCTION TO ACCOUNTING AND BUSINESS

EYE OPENERS

1. The objective of most businesses is to earn a profit. Profit is the difference between the amounts received from customers for goods or services provided and the amounts paid for the inputs used to provide those goods or services.
2. A manufacturing business changes basic inputs into products that are then sold to customers. A service business provides services rather than products to customers. A restaurant such as Applebee's has characteristics of both a manufacturing and a service business in that Applebee's takes raw inputs such as cheese, fish, and beef and processes them into products for consumption by its customers. At the same time, Applebee's provides services of waiting on its customers as they dine.
3. Some users of accounting information include owners, managers, employees, customers, creditors, and the government.
4. Simply put, the role of accounting is to provide information for managers to use in operating the business. In addition, accounting provides information to others to use in assessing the economic performance and condition of the business.
5. The corporate form allows the company to obtain large amounts of resources by issuing stock. For this reason, most companies that require large investments in property, plant, and equipment are organized as corporations.
6. No. The business entity concept limits the recording of economic data to transactions directly affecting the activities of the business. The payment of the interest of \$3,000 is a personal transaction of Barry Bergan and should not be recorded by Elephant Delivery Service.
7. The land should be recorded at its cost of \$115,000 to Gremlin Repair Service. This is consistent with the cost concept.
8.
 - a. No. The offer of \$900,000 and the increase in the assessed value should not be recognized in the accounting records.
 - b. Cash would increase by \$900,000, land would decrease by \$475,000, and owner's equity would increase by \$425,000.
9. An account receivable is a claim against a customer for goods or services sold. An account payable is an amount owed to a creditor for goods or services purchased. Therefore, an account receivable in the records of the seller is an account payable in the records of the purchaser.
10. (a); the business incurred a net loss of \$115,000 (\$715,000 – \$600,000).
11. (b); the business realized net income of \$195,100 (\$687,500 – \$492,400).
12. Net income or net loss
Owner's equity at the end of the period
Cash at the end of the period
