Accounting Grade 11 June 2014:

Negative Monetary Policy Rates and Portfolio Rebalancing: Evidence from Credit Register Data Margherita Bottero, Ms. Camelia Minoiu, José-Luis Peydro, Andrea Polo, Mr. Andrea F. Presbitero, Enrico Sette, 2019-02-28 We study negative interest rate policy (NIRP) exploiting ECB's NIRP introduction and administrative data from Italy severely hit by the Eurozone crisis. NIRP has expansionary effects on credit supply and hence the real economy through a portfolio rebalancing channel. NIRP affects banks with higher ex ante net short term interbank positions or more broadly more liquid balance sheets not with higher retail deposits. NIRP affected banks rebalance their portfolios from liquid assets to credit especially to riskier and smaller firms and cut loan rates inducing sizable real effects. By shifting the entire yield curve downwards NIRP differs from rate cuts just above the ZLB.

Stigma and the Shaping of the Pornography Industry Georgina Voss, 2015-05-15 The idea of pornography is often employed to invoke titillation, anger and disgust. *Stigma and the Shaping of the Pornography Industry* explores the effects that this stigmatized identity has on the pornography industry itself. From the video era to the emergence of the internet to trade shows, white collar workers, technological innovation and industry wide characteristics, this book looks beyond content production to explore how stigma has shaped the structures, practices, norms and boundaries of the wider sector. By drawing on concepts such as dirty work, core stigmatized industries and outlaw innovation, this book offers rich insights into the ways in which stigma is socially constructed and managed and the deep structural effects that it has on the industry.
