Richardson, Professor, 2017-01-03 Accounting Information Systems 2e covers the four roles for accountants with respect to information technology users of technology and information systems managers of users of technology designers of information systems and evaluators of information systems Accountants must understand the organization and how organizational processes generate information important to management The focus of Accounting Information Systems 2 e is on the accountant s role as business analyst in solving business problems by database modeling database design and business process modeling Unlike other texts that provide a broad survey of AIS related topics this text concentrates on developing practical real world business analysis skills Whether you are developing a new course for AIS or incorporating AIS materials into your existing curriculum Accounting Information Systems 2 e will help prepare your students for their future careers *Accounting Information Systems* Joseph W. Wilkinson, Michael J. Cerullo, Vasant Raval, Bernard Wong-On-Wing, 1999-10-05 Intended for a one semester course in Accounting Information Systems taught at the sophomore junior or senior level at most two and four year schools This revision is completely streamlined includes new pedagogy and is accompanied by a CD ROM containing added coverage making it flexible enough to suit a variety of different approaches to the course **Accounting Information Systems** Robert Hurt, Robert L. Hurt, 2015-02-16 Accounting Information Systems Basic Concepts and Current Issues Third Edition provides an interdisciplinary presentation of the fundamental accounting topics and information technology of AIS It is written in a manner intended to develop professional judgment and critical thinking skills so students are prepared to be successful and effectively communicate with accountants and general managers whether their careers take them into public accounting the corporate world governmental and not for profit accounting or another practice Accounting Information Systems Cynthia D. Heagy, Constance M. Lehmann, 2010-04-15 This textbook is intended to meet the needs of a first course in accounting information systems at either the undergraduate or graduate level It may also be used as a review text in second or subsequent courses in this area A primary objective in writing the seventh edition of the text was to present AIS material that would make students more marketable in today s accounting environment Recognizing that over 90 percent of accounting systems are licensed rather than internally custom developed and that the current market demand is for accounting graduates who can install operate and audit such systems this text represents a new paradigm In contrast to traditional accounting systems textbooks that assume an organization will develop its own accounting system and therefore emphasize systems development this textbook gives students the theoretical foundation and skills they will need to conduct a requirements analysis search for a commercial solution and successfully implement the software package selected In addition to learning the essential AIS concepts you will see much discussion and many examples of commercial accounting systems software as it is designed and as it should be designed Another objective in writing this edition was to make the material student friendly Therefore the authors took great care in directing their words to the students Recognizing that this is their first introduction to accounting systems clear definitions of

terms were included and numerous examples and illustrations were incorporated to explain the material The book consists of fifteen chapters The first fourteen chapters provide the theoretical and practical foundation for the final chapter on selecting and implementing AIS software The learning experience will be optimized if all fifteen chapters are covered
