**Globalization and Its Discontents** Joseph E. Stiglitz, 2003-04-17 This powerful unsettling book gives us a rare glimpse behind the closed doors of global financial institutions by the winner of the 2001 Nobel Prize in Economics When it was first published this national bestseller quickly became a touchstone in the globalization debate Renowned economist and Nobel Prize winner Joseph E Stiglitz had a ringside seat for most of the major economic events of the last decade including stints as chairman of the Council of Economic Advisers and chief economist at the World Bank Particularly concerned with the plight of the developing nations he became increasingly disillusioned as he saw the International Monetary Fund and other major institutions put the interests of Wall Street and the financial community ahead of the poorer nations Those seeking to understand why globalization has engendered the hostility of protesters in Seattle and Genoa will find the reasons here While this book includes no simple formula on how to make globalization work Stiglitz provides a reform agenda that will provoke debate for years to come Rarely do we get such an insider's analysis of the major institutions of globalization as in this penetrating book With a new foreword for this paperback edition

*Tropic of Capricorn* Henry Miller, 2015-06-04 A cult modern classic *Tropic of Capricorn* is as daring frank and influential as Henry Miller first novel *Tropic of Cancer* A story of sexual and spiritual awakening *Tropic of Capricorn* shocked readers when it was published in 1939 A mixture of fiction and autobiography it is the story of Henry V Miller who works for the Cosmodemonic telegraph company in New York in the 1920s and tries to write the most important work of literature that was ever published *Tropic of Capricorn* paints a dazzling picture of the life of the writer and of New York City between the wars the skyscrapers and the sewers the lust and the dejection the smells and the sounds of a city that is perpetually in motion threatening to swallow everyone and everything Literature begins and ends with the meaning of what Miller has done Lawrence Durrell The only imaginative prose writer of the slightest value who has appeared among the English speaking races for some years past George Orwell The greatest American writer Bob Dylan Henry Miller 1891 1980 is one of the most important American writers of the 20th century His best known novels include *Tropic of Cancer* 1934 *Tropic of Capricorn* 1939 and the *Rosy Crucifixion* trilogy *Sexus* 1949 *Plexus* 1953 and *Nexus* 1959 all published in France and banned in the US and the UK until 1964 He is widely recognised as an irreverent risk taking writer who redefined the novel and made the link between the European avant garde and the American Beat generation

*Carbohydrate-based Vaccines* René Roy, 2008 This book is the first of its kind entirely dedicated to carbohydrate vaccines written by renowned scientists with expertise in carbohydrate chemistry and immunochemistry It covers the synthesis of carbohydrate antigens related to bacteria and parasites such as *Haemophilus influenza* *Streptococcus pneumoniae* *Shigella flexneri* *Candida albicans* *Mycobacterium tuberculosis* and *Chlamydia* The first three chapters are of wide interest as they cover fundamental concerns in new vaccine developments The first one presents the immune system and how carbohydrate antigens are processed before protective antibodies are produced It also illustrates antigen presentation in the context of major histocompatibility complexes MHCs The second chapter describes regulatory issues when carbohydrate vaccines are involved while the third one discusses several techniques used in conjugation chemistry and the implication of certain chemical linkages that may induce unexpected anti linker antibodies This section will be particularly appealing for those involved in drug conjugate design pro drug developments and drug vectorization The book concludes with one chapter that illustrates the principle through which peptide antigens can functionally mimic carbohydrate epitopes thus unraveling the potential for peptide surrogates as replacement for complex carbohydrate structures This book is unique in that it covers all aspects related to carbohydrate vaccines including the success story with the first semi synthetic bacterial polysaccharide vaccine against *Haemophilus influenza* type b responsible for pneumonia and meningitis liable for more than 600 000 infant deaths worldwide in developing countries The book also presents regulatory issues and will thus be vital for government agencies approving candidate vaccines It widely covers

synthetic methodologies for the attachment of carbohydrate antigens to peptides and immunogenic protein carriers Vaccines against bacterial antigens cancer and parasites are also discussed by worldwide experts in this field in details No other book contains such a wide panel of different expertise It will also be useful to students and researchers involved with the immunology of foreign antigens and how the under appreciated carbohydrate antigens are processed by the immune system
