ICIE2013- International Conference on Innovation and Entrepreneurship Dr. Radwan A. Kharabsheh,2013-02-05 Edited by Dr Radwan A Kharabsheh The Hashemite University Amman Jordan PRINT version of the proceedings of the International Conference on Innovation and Entrepreneurship ICIE 2013 hosted by The Hashemite University in cooperation with The Arab Administrative Development Organization Amman Jordan on the 4 5 March 2013 This is a single volume with 199 pages **Handbook of Climate Services** Walter Leal Filho,Daniela Jacob,2020-01-17 This book explores climate services including projections descriptive information analyses assessments and an overview of current trends Due to the pressures now being put on the world s climate it is vital to gather and share reliable climate observation and projection data which may be tailored for use by different groups In other words it is essential to offer climate services But despite the growth in the use of these services there are very few specialist publications on this topic This book addresses that need Apart from presenting studies and the results of research projects the book also offers an overview of the wide range of means available for providing and using climate services In addition it features case studies that provide illustrative and inspiring examples of how climate services can be optimally deployed OECD Studies on Water Diffuse Pollution, Degraded Waters Emerging Policy Solutions OECD,2017-03-22 After decades of regulation and investment to reduce point source water pollution OECD countries still face water quality challenges e g eutrophication from diffuse agricultural and urban sources of pollution that is disperse pollution from surface runoff soil filtration The Oxford Handbook of Law, Regulation and Technology Roger Brownsword,Eloise Scotford,Karen Yeung,2017-07-25 The variety pace and power of

technological innovations that have emerged in the 21st Century have been breathtaking. These technological developments which include advances in networked information and communications, biotechnology, neurotechnology, nanotechnology, robotics, and environmental engineering technology have raised a number of vital and complex questions. Although these technologies have the potential to generate positive transformation and help address grand societal challenges, the novelty associated with technological innovation has also been accompanied by anxieties about their risks and destabilizing effects. Is there a potential harm to human health or the environment? What are the ethical implications? Do these innovations erode or antagonize values such as human dignity, privacy, democracy, or other norms underpinning existing bodies of law and regulation? These technological developments have therefore spawned a nascent but growing body of law and technology scholarship broadly concerned with exploring the legal, social, and ethical dimensions of technological innovation. This handbook collates the many and varied strands of this scholarship, focusing broadly across a range of new and emerging technology and a vast array of social and policy sectors through which leading scholars in the field interrogate the interfaces between law, emerging technology, and regulation. Structured in five parts, the handbook I establishes the collection of essays within existing scholarship concerned with law and technology as well as regulatory governance; II explores the relationship between technology development by focusing on core concepts and values which technological developments implicate; III studies the challenges for law in responding to the emergence of new technologies, examining how legal norms, doctrine, and institutions have been shaped, challenged, and destabilized by technology, and even how technologies have been shaped by legal regimes; IV provides a critical exploration of the implications of technological innovation, examining the ways in which technological innovation has generated challenges for regulators in the governance of technological development and the implications of employing new technologies as an instrument of regulatory governance; V explores various interfaces between law, regulatory governance, and new technologies across a range of key social domains.

Diffuse Pollution, Degraded Waters: emerging policy solutions Organisation for Economic Co-Operation and Development (OECD), 2017-06-15. After decades of regulation and investment to reduce point source water pollution, OECD countries still face water quality challenges, e.g., eutrophication from diffuse agricultural and urban sources of pollution that is dispersed pollution from surface runoff, soil filtration, and atmospheric deposition. The relative lack of progress reflects the complexities of controlling multiple pollutants from multiple sources, their high spatial and temporal variability, associated transactions costs, and limited political acceptability of regulatory measures. This report outlines the water quality challenges facing OECD countries today, presents a range of policy instruments and innovative case studies of diffuse pollution control, and concludes with an integrated policy framework to tackle diffuse water pollution. An optimal approach will likely entail a mix of policy interventions reflecting the basic OECD principles of water quality management: pollution prevention, treatment at source, the polluter pays, and beneficiary pays principles, equity, and policy coherence.

The Climate Solution Mridula Ramesh, 2018-05-30. From fatal

heatwaves and cruel droughts to devastating floods and fast depleting water tables climate change is the greatest disruptor of our time and it can no longer be ignored For most of us the odds seem overwhelming and solutions seem out of reach Yet in this forcefully argued book climate change practitioner teacher and investor Mridula Ramesh emphasizes that while the situation is grim it is not without hope Drawing on her extensive practical and investing experience she explores myriad facets of this raging issue why women are peculiarly affected by a warming climate how climate change poses a security threat to the Indian state why just focussing on green sources of power is an incomplete solution for India how managing waste can create hundreds of thousands of urban jobs and how households can cope in a Day Zero water situation In doing so she shows how climate warriors from the cotton fields of Punjab and thriving eco start ups in Bengaluru to a forest guardian in Assam and the johads of Rajasthan have employed ingenuity and initiative to adapt to the changing conditions and sometimes reverse their shattering effects Timely urgent and thought provoking this book is an urgent call to action and an essential manifesto for every Indian citizen to follow

Rather than putting in place tough measures to achieve the Paris targets however the government reframed global warming as a market opportunity for Canada's clean technology sector The Big Stall traces the origins of the government's climate change plan back to the energy sector itself in particular Big Oil It shows how in the last fifteen years Big Oil has infiltrated provincial and federal governments academia media and the non profit sector to sway government and public opinion on the realities of climate change and what needs to be done about it Working both behind the scenes and in high profile networks Canada's energy companies moved the debate away from discussion of the measures required to create a zero carbon world and towards market based solutions that will cut carbon dioxide emissions but not enough to prevent severe climate impacts This is how Big Oil and think tanks unraveled the Kyoto Protocol and how Rachel Notley came to deliver the Business Council of Canada's energy plan Donald Gutstein explains how and why the door has been left wide open for oil companies to determine their own futures in Canada and to go on drilling new wells building new oil sands plants and constructing new pipelines This book offers the background information readers need to challenge politicians claiming they are taking meaningful action on global warming
