A Failure of Initiative United States. Congress. House. Select Bipartisan Committee to Investigate the Preparation for and Response to Hurricane Katrina, 2006 *Heartbroke* Chelsea Bieker, 2023-04-04 Winner of the California Book Award From the acclaimed author of *Godshot* and a pitch perfect ventriloquist of extraordinary talent and ferocity T Kira Madden comes a defining book of Californian stories where everyone is seeking or sabotaging love United by the stark and sprawling landscapes of California's Central Valley the characters of *Heartbroke* boil with reckless desire A woman steals a baby from a shelter in an attempt to recoup her own lost motherhood A phone sex operator sees divine opportunity when a lavender eyed cowboy walks into her life A mother and a son selling dream catchers along a highway that leads to a toxic beach manifest two young documentary filmmakers into their realm And two teenage girls play a dangerous online game with destiny *Heartbroke* brims over with each character's attempt to salvage grace where they can find it Told in bright snapping prose that reveals a world of loss and love underneath Chelsea Bieker brilliantly illuminates a golden yet gothic world of longing and abandonment under an unrelenting California sun [Water and Energy](#) Gustaf Olsson, 2015-06-14 Rapid and important developments in the area of energy water nexus over the last two to three years have been significant This new edition of *Water and Energy Threats and Opportunities* is timely and continues to highlight the inextricable link between water and energy providing an up to date overview of the subject with helpful detailed summaries of the technical literature *Water and Energy* has been up dated throughout and major changes are new chapters on global warming and fossil fuels including shale gas and fracking the consequences of the Deepwater Horizon accident in the Mexican Gulf and the Niger Delta oil spills new developments in hydropower and continued competition between food water and energy *Water and Energy Threats and Opportunities 2e* creates an awareness of the important couplings between water and energy It shows how energy is used in all the various water cycle operations and demonstrates how water is used and misused in all kinds of energy production and generation Population increase climate change and an increasing competition between food and fuel production create enormous pressures on both water and energy availability Since there is no replacement for water water security looks more crucial than energy security This is true not only in developing countries but also in the most advanced countries For example the western parts of the USA suffer from water scarcity that provides a real security threat Part One of the book describes the water energy nexus the conflicts and competitions and the couplings between water security energy security and food security Part Two captures how climate change population increase and the growing food demand will have major impact on water availability in many countries in the world Part Three describes water for energy and how energy production and conversion depend on water availability As a consequence all planning has to take both water and energy into consideration The environmental including water consequences of oil and coal exploration and refining are huge in North America as well as in the rest of the world Furthermore oil leak accidents have hit America Africa Europe as well as Asia The

consequences of hydropower are discussed and the competition between hydropower generation flood control and water storage is illustrated The importance of water for cooling thermal power plants is described as this was so tragically demonstrated at the Fukushima nuclear plants in 2011 Climate change will further emphasize the strong coupling between water availability and the operation of power plants Part Four analyses energy for water how water production and treatment depend on energy The book shows that a lot can be done to improve equipment develop processes and apply advanced monitoring and control to save energy for water operations Significant amounts of energy can be saved by better pumping the reduction of leakages controlled aeration in biological wastewater treatment more efficient biogas production and by improved desalination processes There are 3 PowerPoint presentations available for Water and Energy threats and opportunities 2e About the author Gustaf Olsson Professor Em in Industrial Automation Lund University Sweden Since 2006 Gustaf has been Professor Emeritus at Lund University Sweden Gustaf has devoted his research to control and automation in water systems electrical power systems and process industries From 2006 to 2008 he was part time professor in electrical power systems at Chalmers University of Technology Sweden He is guest professor at the Technical University of Malaysia UTM and at the Tsinghua University in Beijing China and he is an honorary faculty member of the Exeter University in UK Between 2005 and 2010 he was the editor in chief of the journals Water Science and Technology and Water Science and Technology Water Supply IWA Publishing From 2007 to 2010 he was a member of the IWA Board of Directors and in 2010 he received the IWA Publication Award In 2012 he was the awardee of an Honorary Doctor degree at UTM and an Honorary Membership of IWA Gustaf has guided 23 PhDs and a few hundred MSc students through their exams and has received the Lund University pedagogical award for distinguished achievements in the education The Lund University engineering students elected him as the teacher of the year He has spent extended periods as a guest professor and visiting researcher at universities and companies in the USA Australia and Japan and has been invited as a guest lecturer in 19 countries outside Sweden He has authored nine books published in English Russian German and Chinese and contributed with chapters in another 19 books as well as more than 170 scientific publications

The Democratization of Artificial Intelligence

Andreas Sudmann, 2019-10-31 After a long time of neglect Artificial Intelligence is once again at the center of most of our political economic and socio cultural debates Recent advances in the field of Artificial Neural Networks have led to a renaissance of dystopian and utopian speculations on an AI rendered future Algorithmic technologies are deployed for identifying potential terrorists through vast surveillance networks for producing sentencing guidelines and recidivism risk profiles in criminal justice systems for demographic and psychographic targeting of bodies for advertising or propaganda and more generally for automating the analysis of language text and images Against this background the aim of this book is to discuss the heterogeneous conditions implications and effects of modern AI and Internet technologies in terms of their political dimension What does it mean to critically investigate efforts of net politics in the age of machine learning algorithms

Masters of Uncertainty Phaedra Daipha, 2015-11-17 In *Masters of Uncertainty* Phaedra Daipha offers a new framework for understanding decision making practice after spending years immersed in a northeastern office of the National Weather Service. Arguing that forecasters have made a virtue of the unpredictability of the weather, Daipha shows how they enlist an omnivorous appetite for information and improvisational collage techniques to create a locally meaningful forecast on their computer screens. This richly detailed and lucidly written book advances a theory of decision making that foregrounds the pragmatic and situated nature of expert cognition and casts new light on how we make decisions in the digital age. Robert Henson, 2013-01-05 From low humor to high drama TV weather reporting has encompassed an enormous range of styles and approaches triggering chuckles, infuriating the masses and at times even saving lives. In *Weather on the Air*, meteorologist and science journalist Robert Henson covers it all: the people, technology, science, and show business that combine to deliver the weather to the public each day. Featuring the long term drive to professionalize weathercasting, the complex relations between government and private forecasters, and the effects of climate change, science, and the Internet on today's broadcasts. With dozens of photos and anecdotes illuminating the many forces that have shaped weather broadcasts over the years, this engaging study will be an invaluable tool for students of broadcast meteorology and mass communication and an entertaining read for anyone fascinated by the public face of weather. **Mia Gets Sick, But Doesn't Quit**

Samantha Chatman, 2021-12-15 Frustrated about being sick and having to stay home from school, Mia eventually discovers newfound activities to enjoy. Mia's shift in perspective helps her realize that no matter where she spends her time, she can be productive, crafty, and have fun. In the end, she learns that her circumstances are only temporary and that she should never quit.
