Storm-surge Forecasting J. W. Nickerson,1971 The report contains an adaptation of a unique storm surge forecasting technique developed by Dr C P Jelesnianski This technique results in a computed storm surge profile at the inner boundary of an artificial standard basin seaward of the coast The profile is derived from nomograms based upon a standard storm passing over a standard basin Thumb rules and guidelines are presented in the publication for subjectively modifying the computer storm surge height as it moves shoreward of the artificial basin boundary to fit the natural conditions of a particular coastline Major advantages of this system are its applicability to almost any locale its adaptability to data normally available to the field forecaster and the speed with which the forecast may be modified to remain current with natural fluctuations of the storm **NFPA 1600, Standard on Disaster/emergency Management and Business Continuity Programs** National Fire Protection Association,2013 **End-User Development** Volkmar Pipek,Mary-Beth Rosson,Volker Wulf,2009-02-24 Work practices and organizational processes vary widely and evolve constantly The technological infrastructure has to follow allowing or even supporting these changes Traditional approaches to software engineering reach their limits whenever the full spectrum of user requirements cannot be anticipated or the frequency of changes makes software reengineering cycles

too clumsy to address all the needs of a specific field of application Moreover the increasing importance of infrastructural aspects particularly the mutual dependencies between technologies usages and domain competencies calls for a differentiation of roles beyond the classical user designer dichotomy End user development EUD addresses these issues by offering lightweight use time support which allows users to configure adapt and evolve their software by themselves EUD is understood as a set of methods techniques and tools that allow users of software systems who are acting as non professional software developers to 1 create modify or extend a software artifact While programming activities by non professional actors are an essential focus EUD also investigates related activities such as collective understanding and sense making of use problems and solutions the interaction among end users with regard to the introduction and diffusion of new configurations or delegation patterns that may also partly involve professional designers

**Masters of Uncertainty** Phaedra Daipha,2015-11-17 In *Masters of Uncertainty* Phaedra Daipha offers a new framework for understanding decision making practice after spending years immersed in a northeastern office of the National Weather Service Arguing that forecasters have made a virtue of the unpredictability of the weather Daipha shows how they enlist an omnivorous appetite for information and improvisational collage techniques to create a locally meaningful forecast on their computer screens This richly detailed and lucidly written book advances a theory of decision making that foregrounds the pragmatic and situated nature of expert cognition and casts new light on how we make decisions in the digital age Page 4 of cover

**The Pennsylvania Weather Book** Ben Gelber,2002 A television meteorologist in Columbus Ohio Gelber offers a comprehensive

source of historical weather events in Pennsylvania in hopes that it will provide a chronological database with sufficient information and sources for others to document past weather events in their own communities Annotation copyrighted by Book News Inc Portland OR *Special Publication* ,2006 **Red Hot Lies** Christopher C. Horner,2008-11-11 Liars Al Gore the United Nations the New York Times The global warming lobby relentless in its push for bigger government more spending and more regulation will use any means necessary to scare you out of your wits as well as your tax dollars and your liberties with threats of rising oceans deadly droughts and unspeakable future consequences of climate change In pursuing their anti energy anti capitalist and pro government agenda the global warming alarmists and unscrupulous scientists who see this scare as their gravy train to federal grants and foundation money resort to dirty tricks smear campaigns and outright lies abandoning scientific standards journalistic integrity and the old fashioned notions of free speech and open debate In *Red Hot Lies* bestselling author Christopher Horner himself the target of Greenpeace dirty tricks and alarmist smears exposes the dark underbelly of the environmental movement Power hungry politicians blacklist scientists who reject global warming alarmism U S senators threaten companies that fund climate change dissenters Mainstream media outlets openly reject the notion of balance The occasional unguarded scientist candidly admits the need to twist the facts to paint an uglier picture in order to keep the faucet of government money flowing In the name of saving the planet anything goes But why the nasty tactics Why the cover ups lies and intimidation Because Al Gore and his ilk want to use big government at the local state federal and global level to run your life and they can brook no opposition But the actual facts as *Red Hot Lies* makes clear aren't nearly as scary as their fiction
