*EM*, 1996 *Storm-surge Forecasting* J. W. Nickerson, 1971 The report contains an adaptation of a unique storm surge forecasting technique developed by Dr C P Jelesnianski This technique results in a computed storm surge profile at the inner boundary of an artificial standard basin seaward of the coast The profile is derived from nomograms based upon a standard storm passing over a standard basin Thumb rules and guidelines are presented in the publication for subjectively modifying the computer storm surge height as it moves shoreward of the artificial basin boundary to fit the natural conditions of a particular coastline Major advantages of this system are its applicability to almost any locale its adaptability to data normally available to the field forecaster and the speed with which the forecast may be modified to remain current with natural fluctuations of the storm
