Findlay, Bruce W. Hevly,2011-10-01 Outstanding Title by Choice Magazine On the banks of the Pacific Northwest s greatest river lies the Hanford nuclear reservation an industrial site that appears to be at odds with the surrounding vineyards and desert The 586 square mile compound on the Columbia River is known both for its origins as part of the Manhattan Project which made the first atomic bombs and for the monumental effort now under way to clean up forty five years of waste from manufacturing plutonium for nuclear weapons Hanford routinely makes the news as scientists litigants administrators and politicians argue over its past and its future It is easy to think about Hanford as an expression of federal power a place apart

from humanity and nature but that view distorts its history Atomic Frontier Days looks through a wider lens telling a complex story of production community building politics and environmental sensibilities In brilliantly structured parallel stories the authors bridge the divisions that accompany Hanford s headlines and offer perspective on today s controversies Influenced as much by regional culture economics and politics as by war diplomacy and environmentalism Hanford and the Tri Cities of Richland Pasco and Kennewick illuminate the history of the modern American West

Swipe to Unlock Neel Mehta, Parth Detroja, Aditya Agashe, 2017 WANT A NON CODING JOB AT A TECH COMPANY Interested in product management marketing strategy or business development The tech industry is the place to be nontechnical employees at tech companies outnumber their engineering counterparts almost 3 to 1 Forbes 2017 You might be worried that your lack of coding skills or tech industry knowledge will hold you back But here s the secret you don t need to learn how to code to break into the tech industry Written by three former Microsoft PMs Swipe to Unlock gives you a breakdown of the concepts you need to know to crush your interviews like software development big data and internet security We ll explain how Google s ad targeting algorithm works but Google probably won t ask you how to explain it in a non technical interview But they might ask you how you could increase ad revenue from a particular market segment And if you know how Google s ad platform works you ll be in a far stronger position to come up with good growth strategies We ll show you how Robinhood an app that lets you trade stocks without commission makes money by earning interest on the unspent money that users keep in their accounts No one will ask you to explain this But if someone asks you to come up with a new monetization strategy for Venmo

which lets you send and receive money without fees you could pull out the Robinhood anecdote to propose that Venmo earn interest off the money sitting in users accounts We ll talk about some business cases like why Microsoft acquired LinkedIn Microsoft interviewers probably won t ask you about the motive of the purchase but they might ask you for ideas to improve Microsoft Outlook From our case study you ll learn how the Microsoft and LinkedIn ecosystems could work together which can help you craft creative impactful answers You could propose that Outlook use LinkedIn s social graph to give salespeople insights about clients before meeting them Or you could suggest linking Outlook s organizational tree to LinkedIn to let HR managers analyze their company s hierarchy and figure out what kind of talent they need to add We ll further explore both ideas in the book Either way you re sure to impress Learn the must know concepts of tech from authors who have received job offers for Facebook s Rotational Product Manager Google s Associate Product Marketing Manager and Microsoft s Program Manager to get a competitive edge at your interviews

The Dynamics of Disaster Susan W. Kieffer, 2013-10-21 Natural disasters bedevil our planet and each appears to be a unique event Leading geologist Susan W Kieffer shows how all disasters are connected In 2011 there were fourteen natural calamities that each destroyed over a billion dollars worth of property in the United States alone In 2012 Hurricane Sandy ravaged the East Coast and major earthquakes struck in Italy the Philippines Iran and Afghanistan In the first half of 2013 the awful drumbeat continued a monster supertornado struck Moore Oklahoma a powerful earthquake shook Sichuan China a cyclone ravaged Queensland Australia massive floods inundated Jakarta Indonesia and the largest wildfire ever engulfed a large part of Colorado Despite these events we still behave as if natural disasters are outliers Why else would we continue to build new communities near active volcanoes on tectonically active faults on flood plains and in areas routinely lashed by vicious storms A famous historian once observed that civilization exists by geologic consent subject to change without notice In the pages of this unique book leading geologist Susan W Kieffer provides a primer on most types of natural disasters earthquakes tsunamis volcanoes landslides hurricanes cyclones and tornadoes By taking us behind the scenes of the underlying geology that causes them she shows why natural disasters are more common than we realize and that their impact on us will increase as our growing population crowds us into ever more

vulnerable areas Kieffer describes how natural disasters result from changes in state in a geologic system much as when water turns to steam By understanding what causes these changes of state we can begin to understand the dynamics of natural disasters In the book s concluding chapter Kieffer outlines how we might better prepare for and in some cases prevent future disasters She also calls for the creation of an organization something akin to the Centers for Disease Control and Prevention but focused on pending natural disasters

Editor & Publisher International Year Book, 2004 The encyclopedia of the newspaper industry **The Illio** University of Illinois (Urbana-Champaign campus), 1895 [A Survey of Television](#) Stuart Hood, 1969 [Earth: The Operators' Manual](#) Richard B. Alley, 2011-04-18 The book companion to a PBS series that proves humans are causing global warming and offers a path to the future Since the discovery of fire humans have been energy users and always will be And this is a good thing our mastery of energy is what separates us from the rest of the animal kingdom and has allowed us to be the dominant species on the planet However this mastery comes with a price we are changing our environment in a profoundly negative way by heating it up Using one engaging story after another coupled with accessible scientific facts world authority Richard B Alley explores the fascinating history of energy use by humans over the centuries gives a doubt destroying proof that already high levels of carbon dioxide are causing damaging global warming and surveys the alternative energy options that are available to exploit right now These new energy sources might well be the engines for economic growth in the twenty first century

Relationship Between Quality of Life and Energy Usage Reza Nadimi, 2019-04-17 This book utilizes statistical techniques to define a quality of life QoL indicator combining the three dimensions of economy health and education In turn it uses modeling to assess the impact of energy consumption on 112 countries QoL What sets the proposed model apart from previous research is its ability to distinguish between pre developing developing and developed countries One important aspect of this distinction is their different global energy policies and their priorities with regard to achieving sustainable energy consumption Accordingly the book also discusses eco sufficiency eco efficiency and energy poverty reduction for the three different types of countries In turn the book provides general information on how to reconcile sustainable energy consumption with QoL and economic development Optimization programming technique and simulation are applied to measure potential energy saving in each country without sacrificing economic progress and while maintaining QoL Given its scope the book is highly recommended to the following audiences 1 readers seeking a state of the art quantitative work on energy systems and QoL 2 manufacturers and developers of renewable energy technologies who consider renewables as an option for mitigating energy poverty and 3 international institutions such as the United Nations seeking a sustainable global energy strategy

Science for All Americans F. James Rutherford, Andrew Ahlgren, 1991-02-14 In order to compete in the modern world any society today must rank education in science mathematics and technology as one of its highest priorities It s a sad but true fact however that most Americans are not scientifically literate International studies of educational performance reveal that U S students

consistently rank near the bottom in science and mathematics The latest study of the National Assessment of Educational Progress has found that despite some small gains recently the average performance of seventeen year olds in 1986 remained substantially lower than it had been in 1969 As the world approaches the twenty first century American schools when it comes to the advancement of scientific knowledge seem to be stuck in the Victorian age In Science for All Americans F James Rutherford and Andrew Ahlgren brilliantly tackle this devastating problem Based on Project 2061 a scientific literacy initiative sponsored by the American Association for the Advancement of Science this wide ranging important volume explores what constitutes scientific literacy in a modern society the knowledge skills and attitudes all students should acquire from their total school experience from kindergarten through high school and what steps this country must take to begin reforming its system of education in science mathematics and technology Science for All Americans describes the scientifically literate person as one who knows that science mathematics and technology are interdependent enterprises with strengths and limitations who understands key concepts and principles of science who recognizes both the diversity and unity of the natural world and who uses scientific knowledge and scientific ways of thinking for personal and social purposes Its recommendations for educational reform downplay traditional subject categories and instead highlight the connections between them It also emphasizes ideas and thinking skills over the memorization of specialized vocabulary For instance basic scientific literacy means knowing that the chief function of living cells is assembling protein molecules according to the instructions coded in DNA molecules but does not mean necessarily knowing the terms ribosome or deoxyribonucleic acid Science mathematics and technology will be at the center of the radical changes in the nature of human existence that will occur during the next life span therefore preparing today s children for tomorrow s world must entail a solid education in these areas Science for All Americans will help pave the way for the necessary reforms in America s schools
