Findlay, Bruce W. Hevly, 2011-10-01 Outstanding Title by Choice Magazine On the banks of the Pacific Northwest s greatest river lies the Hanford nuclear reservation an industrial site that appears to be at odds with the surrounding vineyards and desert The 586 square mile compound on the Columbia River is known both for its origins as part of the Manhattan Project which made the first atomic bombs and for the monumental effort now under way to clean up forty five years of waste from manufacturing plutonium for nuclear weapons Hanford routinely makes the news as scientists litigants administrators and politicians argue over its past and its future It is easy to think about Hanford as an expression of

federal power a place apart from humanity and nature but that view distorts its history Atomic Frontier Days looks through a wider lens telling a complex story of production community building politics and environmental sensibilities In brilliantly structured parallel stories the authors bridge the divisions that accompany Hanford's headlines and offer perspective on today's controversies Influenced as much by regional culture economics and politics as by war diplomacy and environmentalism Hanford and the Tri Cities of Richland Pasco and Kennewick illuminate the history of the modern American West

Galambos, James Lechner, Emil Simiu, 2013-12-01 It appears that we live in an age of disasters the mighty Mississippi and Missouri flood millions of acres earthquakes hit Tokyo and California airplanes crash due to mechanical failure and the seemingly ever increasing wind speeds make the storms more and more frightening While all these may seem to be unexpected phenomena to the man on the street they are actually happening according to well defined rules of science known as extreme value theory We know that records must be broken in the future so if a flood design is based on the worst case of the past then we are not really prepared against floods Materials will fail due to fatigue so if the body of an aircraft looks fine to the naked eye it might still suddenly fail if the aircraft has been in operation over an extended period of time Our theory has by now penetrated the social sciences the medical profession economics and even astronomy We believe that our field has come of age In order to fully utilize the great progress in the theory of extremes and its ever increasing acceptance in practice an international conference was organized in which equal weight was given to theory and practice This book is Volume I of the Proceedings of this conference In selecting the papers for Volume four guide was to have authoritative works with a large variety of coverage of both theory and practice
