ACE Inhibitors in Hypertension G. Strube, 2012-12-06 ACE inhibitors are one of the most exciting and interesting of recent medical developments They fit the patho physiological processes of cardiovascular disease with fascinating precision and are a constant stimulus to the acquisition of greater understanding of the mechanisms involved and of the mode of action of the drugs themselves There is still much to be learned especially about the wider effects of the drugs their precise mode and site of action and about differences between the different preparations ACE inhibitors are of proven benefit to patients with chronic congestive heart failure and are the latest in the series of drugs used in the treatment of hypertension Interest in the treatment of hypertension has paralleled the development of hypotensive drugs and the realisation that long term prognosis could be significantly improved The treatment of hypertension has progressed in stages following the development of a succession of increasingly effective drugs each allowing a greater proportion of patients to be treated with fewer and fewer side effects First the ganglion blocking agents such as hexamethonium and guan ethidine transformed the outlook for patients with malignant hypertension but proved too unpleasant for routine use in other forms of hypertension

Report of the Joint National Committee on Detection, Evaluation, and Treatment of High Blood Pressure Joint National Committee on Detection, Evaluation, and Treatment of High Blood Pressure, Home Blood Pressure Monitoring George S.

Stergiou, Gianfranco Parati, Giuseppe Mancina, 2019-10-31 Hypertension remains a leading cause of disability and death worldwide Self monitoring of blood pressure by patients at home is currently recommended as a valuable tool for the diagnosis and management of hypertension Unfortunately in clinical practice home blood pressure monitoring is often inadequately implemented mostly due to the use of inaccurate devices and inappropriate methodologies Thus the potential of

the method to improve the management of hypertension and cardiovascular disease prevention has not yet been exhausted This volume presents the available evidence on home blood pressure monitoring discusses its strengths and limitations and presents strategies for its optimal implementation in clinical practice Written by distinguished international experts it offers a complete source of information and guide for practitioners and researchers dealing with the management of hypertension

From Hypertension to Heart Failure Michael Böhm,John H. Laragh,Manfred Zehender,2012-12-06 Arterial hypertension coronary heart disease and heart failure are the commonest cardiovascular conditions to present in clinical practice Over the past few years it has become increasingly clear that they are closely and causally interrelated and that their relationship can have a significant bearing on prognosis Epidemiological studies have shown that arterial hypertension is one of the most important risk factors for developing heart failure Only one in four patients with hypertension is adequately managed and in 50% of cases the hypertension has not been recognised or treated Patients with pre existing hypertension who go on to suffer an acute myocardial infarction have usually not previously had typical angina symptoms the infarct territory is larger life threatening arrhythmias are commoner and hence in hospital mortality and long term prognosis are markedly worse The presence of raised blood pressure in the post infarct phase doubles the risk of manifest heart failure The close relationship between hypertension coronary heart disease and heart failure makes the choice of

therapeutic strategy particularly important Agents and classes of agents that have prognostic value in all three conditions should be considered first as synergy might result in additional benefits In such patients this sort of therapeutic decision making might have further advantages The use of these agents may prevent complications which are not yet clinically obvious such as heart failure
