the region so that they aim for and deliver higher quality education for the vast majority of students not just diplomas but skills To start with education systems need to turn the lights on and take seriously the measurement of what students actually learn as opposed to measurement of the inputs into the education process on the implicit assumption that learning follows Policy makers also need to move away from the focus on inputs and processes and increase the emphasis on incentives

Simon Anholt,2006-08-11 Recently vilified as the prime dynamic driving home the breach between poor and rich nations here the branding process is rehabilitated as a potential saviour of the economically underprivileged Brand New Justice now in a revised paperback edition systematically analyses the success stories of the Top Thirteen nations demonstrating that their wealth is based on the last mile of the commercial process buying raw materials and manufacturing cheaply in third world countries these countries realise their lucrative profits by adding value through finishing packaging and marketing and then selling the branded product on to the end user at a hugely inflated price The use of sophisticated global media techniques alongside a range of creative marketing activities are the lynchpins of this process Applying his observations on economic history and the development and impact of global marketing Anholt presents a cogent plan for developing nations to benefit from globalization So long the helpless victim of capitalist trading systems he shows that they can cross the divide and graduate from supplier nation to producer nation Branding native produce on a global scale making a commercial virtue out of perceived authenticity and otherness and fully capitalising on the last mile benefits are key to this graduation and

fundamental to forging a new global economic balance Anholt argues with a forceful logic but also backs his hypothesis with enticing glimpses of this process actually beginning to take place Examining activities in India Thailand Russia and Africa among others he shows the risks challenges and pressures inherent in turning the tide but above all he demonstrates the very real possibility of enlightened capitalism working as a force for good in global terms The Bios Companion Phil Croucher,2001 This text describes the functions that the BIOS controls and how these relate to the hardware in a PC It covers the CMOS and chipset set up options found in most common modern BIOSs It also features tables listing error codes needed to troubleshoot problems caused by the BIOS *Physical Geography* Richard H. Expectations and Aspirations Safaa El Tayeb El-Kogali, Caroline Krafft, 2019-10-21 Education which has been at the heart of the Middle East and North Africa MENA region s history and civilizations for centuries has a large untapped potential to contribute to human capital well being and wealth The region has invested heavily in education for decades but it has not been able to reap the benefits of its investments Despite a series of reforms MENA has remained stuck in a low learning low skills level Expectations and Aspirations A New Framework for Education in the Middle East and North Africa identifies four key sets of tensions that are holding back education in the region credentials and skills discipline and inquiry control and autonomy and tradition and modernity These tensions are shaped by society and are reflected in classrooms If they are not addressed MENA will continue to operate at a level below its potential This report outlines a new framework with a three pronged approach that can help address these tensions and unleash the potential of education in MENA A concerted push for learning that starts early for all children regardless of background with qualified and motivated educators and that leverages technology uses modern approaches and monitors learning outcomes A stronger pull for skills by all stakeholders in the labor market and society that involves coordinated multisystem reforms within and beyond the education system A new pact for education at the national level with a unified vision shared responsibilities and accountabilities Education is not just the responsibility of the education system it is everyone s business The push pull and pact framework offers an opportunity for MENA to move forward to reclaim its heritage of a learned region and to meet the expectations and aspirations of its people The current situation in MENA requires a renewed focus on education not just as a national priority for economic growth and social development but as a national emergency for stability peace and prosperity

Perspectives on the 'Bilingual Advantage': Challenges and

Opportunities Peter Bright,Roberto Filippi,2019-09-05 The claim that multilanguage acquisition drives advantages in executive function is currently an issue of vigorous debate in academic literature Critics argue that evidence for this advantage has been confounded by unsound or questionable methodological practices with some investigators abandoning research in this area altogether indicating either that there is no bilingual advantage or that it is impossible to capture and therefore rule out alternative explanations for group differences Over the past decade and against this backdrop theory has developed from a relatively narrow focus on inhibitory control to incorporate theory of mind rule based learning reactive and proactive control visuo spatial memory and control of verbal interference in speech comprehension Most recently authors have claimed that the process of becoming bilingual may also impact on metacognitive abilities The fundamental issue is whether the limited capacity and goal directed selectivity of our executive system can somehow be enhanced or otherwise profit from the continuous intense competition associated with communicating in multilingual environments However although this issue has received much attention in academic literature the question of which cognitive mechanisms are most influenced by the enhanced competition associated with multilingual contexts remains unresolved Therefore rather than dismissing this important topic we advocate a more systematic approach in which the effects of multilinguistic experience are assessed and interpreted across well defined stages of cognitive development We encourage a broad developmentally informed approach to plotting the trajectory of interactions between multi language learning and cognitive development using a convergence of neuroimaging and behavioral methods across the whole lifespan Moreover we suggest that the current theoretical framing of the bilingual advantage is simplistic and this issue may limit attempts to identify specific mechanisms most likely to be modulated by multilingual experience For example there is a tendency in academic literature to treat executive function as an essentially unitary fronto parietal system recruited in response to all manner of cognitive demand yet performance across so called executive function tasks is highly variable and intercorrelations are sometimes low It may be the case that some higher level mechanisms of executive function remain relatively unaffected while others are more sensitive to multilingual experience and that there may be disadvantages as well as advantages which themselves may be sensitive to factors such as age In our view there is an urgent need to take a more fine grained approach to this issue so that the strength and direction of changes in diverse cognitive abilities associated with multilanguage acquisition can be better understood This book compiles work from psychologists and neuroscientists who actively research whether how and the extent to which multilanguage acquisition promotes enhanced cognition or protects against age related cognitive or neurological deterioration We hope this collection encourages future efforts to drive theoretical progress well beyond the highly simplistic issue of whether the bilingual cognitive advantage is real or spurious
