Columbia, 2009-12 The line began forming after eight o'clock Sal short and heavy set kept everyone busy Neat in a white shirt and sports jacket with his grey fedora cocked to the side his crooked grin made you smile Without warning the heavy door would swing open and the waiters would come outside to join him They were dressed in pajamas or prison garb with hats and horns and were there to warm up the crowd Some in line expected this others were shocked The pink polka dot building should have been a warning Complete strangers in line became chummy exchanging stories they had heard toilet seat covers to serve drinks on microphones in the ladies room toilet paper for napkins Most had brought their friends there to be roasted The line of people varied in age They all dressed casually because they'd heard you could get a pie in the face or a squirt in the eye The club's routines were blue in color but harmless If you were lucky you might see a Balls for the Queen or a Singing beer The price was always right for a good time and Warm Beer and Lousy Food was the place to be

Make Your Smartphone 007 Smart Conrad Jaeger, 2016 The smartphone in your pocket can easily be turned into a high tech spy tool and counter surveillance device to rival anything that Ian Fleming's Q might have dreamt up You can communicate secretly browse the web anonymously access the Deep Web and hidden networks view banned content download privately and continue using Twitter and Facebook if their services are ever blocked locally Conversely mobile devices are not secure unless you make them so If somebody wants to know where you are at this precise moment your smartphone will tell them even if it is turned off The push by the commercial world and more recently by law enforcement and surveillance agencies to monitor all we do has led to a counter revolution The Mobile Internet has evolved and so has its counter surveillance tools Rather like spies in a James Bond movie mobile users have an array of digital tools to call upon both to mask their identity and to provide real confidence that their correspondence data and contacts are secure There are smartphone apps that let you see in the dark or measure the height of a building You can film and record without being rumbled send emails PMs and SMS that cannot be intercepted or read You can even take over and control many public and private security cameras
