A Lost Lady Willa Cather, 2023-11-15 *A Lost Lady* is a novel by American author Willa Cather first published in 1923. It centers on Marian Forrester, her husband Captain Daniel Forrester, and their lives in the small western town of Sweet Water along the Transcontinental Railroad. However, it is mostly told from the perspective of a young man named Niel Herbert as he observes the decline of both Marian and the West itself as it shifts from a place of pioneering spirit to one of corporate exploitation. Exploring themes of social class, money, and the march of progress, *A Lost Lady* was praised for its vivid use of symbolism and setting and is considered to be a major influence on the works of F. Scott Fitzgerald. It has been adapted to film twice, with a film adaptation being released in 1924 followed by a looser adaptation in 1934 starring Barbara Stanwyck. *A Lost Lady* begins in the small railroad town of Sweet Water on the undeveloped Western plains. The most prominent family in the town is the Forresters, and Marian Forrester is known for her hospitality and kindness. The railroad executives frequently stop by her house and enjoy the food and comfort she offers while there on business. A young boy, Niel Herbert, frequently plays on the Forrester estate with his friend. One day, an older boy named Ivy Peters arrives and shoots a woodpecker out of a tree. He then blinds the bird and laughs as it flies around helplessly. Niel pities the bird and tries to climb the tree to put it out of its misery, but while climbing, he slips and breaks his arm in the fall, as well as knocking himself unconscious. Ivy takes him to the Forrester house where Marian looks after him. When Niel wakes up, he is amazed by the nice house and how sweet Marian smells. He doesn't see her much after that, but several years later, he and his uncle Judge Pommeroy are invited to the Forrester house for dinner. There, he meets Ellinger, who he will later learn is Mrs. Forrester's lover, and Constance, a young girl his age.

[Excavation of Two Anasazi Sites in Southern Utah](#), 1981 The two reports published here contain elements which contribute substantially to this broader spectrum of Southwestern cultural change. While primarily descriptive in nature, these two site reports, one from the western Kayenta area and one from the margin of the Mesa Verde area, and the eastern Kayenta suggest that the changes which occurred in the more centralized portions of these regions were directly related to what happened on the margins. That while the site densities and population aggregates may not have been as high, the same factors affected these marginal areas. That

conclusion could be expected but what may not be expected is the differential response which appears to have occurred After reading these two reports it appears that it may be possible to discern elements of change in these fringe areas that once defined will provide new insight into what happened and why and in what are presently the better known areas of the Southwest These two papers are important in sum not only because they are reports of work in poorly known areas but because they do provide analyses of fringe areas they help us to understand the Southwest generally From preliminary introduction *PIRLS 2011 International Results in Reading* Ina V. S. Mullis,2012-12 Riparian Areas National Research Council,Division on Earth and Life Studies,Board on Environmental Studies and Toxicology,Water Science and Technology Board,Committee on Riparian Zone Functioning and Strategies for Management,2002-10-10 The Clean Water Act CWA requires that wetlands be protected from degradation because of their important ecological functions including maintenance of high water quality and provision of fish and wildlife habitat However this protection generally does not encompass riparian areas the lands bordering rivers and lakes even though they often provide the same functions as wetlands Growing recognition of the similarities in wetland and riparian area functioning and the differences in their legal protection led the NRC in 1999 to undertake a study of riparian areas which has culminated in *Riparian Areas Functioning and Strategies for Management* The report is intended to heighten awareness of riparian areas commensurate with their ecological and societal values The primary conclusion is that because riparian areas perform a disproportionate number of biological and physical functions on a unit area basis restoration of riparian functions along America s waterbodies should be a national goal

Rough Sets, Fuzzy Sets, Data Mining and Granular Computing Hiroshi Sakai,Mihir Chakraborty,Aboul-Ella Hassanien,Dominik Slezak,William Zhu,2009-11-30 Welcome to the 12th International Conference on Rough Sets Fuzzy Sets Data Mining and Granular Computing RSFDGrC 2009 held at the Indian Institute of Technology IIT Delhi India during December 15 18 2009

RSFDGrC is a series of conferences spanning over the last 15 years. It investigates the meeting points among the four major areas outlined in its title. This year it was co-organized with the Third International Conference on Pattern Recognition and Machine Intelligence (PRMI 2009) which provided additional means for multi-faceted interaction of both scientists and practitioners. It was also the core component of this year's Rough Set Year in India project. However, it remained a fully international event aimed at building bridges between countries. The first section contains the invited papers and a short report on the above-mentioned project. Let us note that all the RSFDGrC 2009 plenary speakers Ivo D. Džurina, Zbigniew Suraj, Zhongzhi Shi, Sergei Kuznetsov, Qiang Shen, and Yukio Ohsawa contributed with the full-length articles in the proceedings. The remaining six sections contain 56 regular papers that were selected out of 130 submissions, each peer-reviewed by three PC members. We thank the authors for their high-quality papers submitted to this volume and regret that many deserving papers could not be accepted because of our urge to maintain strict standards. It is worth mentioning that there was quite a good number of papers on the foundations of rough sets and fuzzy sets, many of them authored by Indian researchers. The fuzzy set theory has been popular in India for a longer time. Now we can see the rising interest in the rough set theory.
