The Net Effect Thomas Streeter, 2011 This book about America's romance with computer communication looks at the Internet not as a harbinger of the future or the next big thing but as an expression of the times Streeter demonstrates that our ideas about what connected computers are for have been in constant flux since their invention In the 1950s they were imagined as the means for fighting nuclear wars in the 1960s as systems for bringing mathematical certainty to the messy complexity of social life in the 1970s as countercultural playgrounds in the 1980s as an icon for what's good about free markets in the 1990s as a new frontier to be conquered and by the late 1990s as the transcendence of markets in an anarchist open source utopia The Net Effect teases out how culture has influenced the construction of the internet and how the structure of the internet has played a role in cultures of social and political thought cover

Land and Labour Jesper Carlsen, 2013 Modern scholarship dealing with the economy of the ancient world has developed rapidly in recent decades Studies of ancient economic structures and history have in many respects achieved standards as a discipline comparable to those of economic history using models and scenarios exactly as it is frequently seen in studies of later periods with better sources The best example is perhaps the historical demography of Roman Italy It was a marginal field of research until the early 1990s but is now one of the key subjects in the study of Roman economy with a lively debate between the followers of a low count reconstruction of the demographic development in Roman Italy versus the scholars who favour a high count Furthermore quantitative studies have become serious scholarship and are no longer despised as only number games as is apparent for instance from the new Oxford Roman Economy Project This is due to the great amount of published archaeological material such as terra sigillata amphorae and shipwrecks It is also illustrated by the shift from the predominant orthodoxy of the primitivism in the 1970s and 1980s to theoretical and methodological orientations inspired by the so called New Institutional Economics and a diversity of approaches But it has also rightly been

pointed out that the struggle between primitivists and modernists which still a century later continues to haunt scholarly discussions often under the revealing name of minimalists and maximalists signifying that the problem has often wrongly been reduced to one of quantities mainly of trade. All the chapters of this book were originally published as articles or contributions to proceedings of different conferences between 1990 and 2010. *Ciarcia's Circuit Cellar* Steve Ciarcia, 1985

Atlas at War Michael Vassallo, 2020-06-17 *Atlas at War* collects fifty hard hitting stories from Atlas Comics the company that became Marvel Comics and published more war titles than anyone in the industry between the years 1951 and 1960. Comics historian Dr Michael J Vassallo has chosen the best of the best many of which are coming back into print for the first time from sixteen different Atlas war titles and featuring the artwork of twenty different artists giants of the genre including Russ Heath John Severin Bernie Krigstein Joe Maneely Jerry Robinson Steve Ditko and Jack Kirby. Each page has been meticulously restored from its first printing by comic art restorer Allan Harvey. *Atlas at War* covers the brutal pre code period where graphic depictions of war action were rendered by artists who were World War II veterans themselves as well as the post code period where code restrictions forced creators to tell stories without graphic violence but produced some of the most beautiful comic art of the genre. In addition to the artists stories cover all aspects of war from famous campaigns weaponry and personal soldier stories to political topics Nazi atrocities and even one story tinged with pre code horror. Often overlooked in favor of its competitors *Atlas at War* will finally show that Atlas war titles were second to no one. *Global Marketing* Svend Hollensen, 2016-07-08 All good marketing is local.
