LCA of an ecolabeled notebook : consideration of social and environmental impacts along the entire life cycle

Andreas Ciroth,Juliane Franze,2011 This study investigates social and environmental impacts caused by an ecolabeled notebook along its entire life cycle In order to analyse the divers effects of the laptop a social life cycle assessment and an environmental life cycle assessment were performed in parallel Both assessments together provide a holistic overview of positive and negative impacts in regard to social and environmental sustainability This book contains the complete final report written by GreenDeltaTC on behalf of the Belgian Federal Public Planning Service Sustainable Development It comprises the methodological background the social inventory process modifications with regard to the environmental inventory and detailed results of the impact assessment phase Further a newly developed social impact assessment method is presented and applied In addition recommendations on company and policy level were derived Preparing for Life in a Digital World Julian Fraillon,John Ainley,Wolfram Schulz,Tim Friedman,Daniel Duckworth,2020-02-14 This Open Access book summarizes the key findings from the second cycle of IEA s International Computer and Information Literacy Study ICILS conducted in 2018 ICILS seeks to establish how well schools around the globe are responding to the need to provide young people with the necessary digital participatory competencies Effective use of information and communication technologies ICT is an imperative for successful participation in an increasingly digital world ICILS 2018 explores international differences in students computer and information literacy CIL namely their ability to use computers to investigate create and communicate at home at school in the workplace and in the community Participating countries also had an option to administer an assessment of students computational thinking CT focused on their ability to recognize aspects of real world problems appropriate for computational formulation and to evaluate and develop algorithmic solutions to those problems so that the solutions could be operationalized with a computer The data collected by ICILS 2018 show how digital competencies can be assessed using instruments representing authentic contexts for ICT use and how students CIL and CT skills relate to school learning experiences out of school contexts and student characteristics Those data also show how learning technologies are used in classrooms around the world Background questionnaires asked students about their use of ICT and collected information from teachers schools and national education systems about the resourcing and teaching of CIL and CT within their countries The results of ICILS 2018 will enable policymakers and education systems to develop a better understanding of the contexts and outcomes of CIL and CT education programs **Windows 10 For Dummies** Andy Rathbone,2015-08-10 Illustrates the new features of Windows 10 **The Hard Drive Bible** Martin Bodo,1996 THE HARD DRIVE BIBLE EIGHTH EDITION is the definitive reference book for anyone who deals with personal computer data storage devices of any kind This comprehensive work covers installations drive parameters 408 743 8787 Skills, Not Just Diplomas Lars Sondergaard,2012 Future growth in the countries in Eastern Europe and Central Asia ECA will increasingly

depend on innovation And innovation requires skills This makes it important as countries plan for recovery to undertake reforms to reduce the skills shortages that the previous growth episode exposed Education systems have a very important role to play in creating the right skills But education systems in the region fall short of the demands of their economies in two major ways The first is that despite high levels of enrollment they do not produce enough graduates with the right skills Students graduate with diplomas not with skills because the quality of the education for many students is poor In large part this is because education systems remain focused on providing an excellent education to a few at the expense of improving the quality of learning for the majority Moreover the systems are still making the transition from teaching the basics to inculcating higher order skills such as critical thinking and problem solving The second way in which education systems fall short is that outside of a few countries in the EU there are few opportunities for adults to retrain or acquire new skills This book argues that generating more of the right skills requires a fundamental change of approach in the education systems in the region so that they aim for and deliver higher quality education for the vast majority of students not just diplomas but skills To start with education systems need to turn the lights on and take seriously the measurement of what students actually learn as opposed to measurement of the inputs into the education process on the implicit assumption that learning follows Policy makers also need to move away from the focus on inputs and processes and increase the emphasis on incentives

Computer and Information Literacy Study 2018 Assessment Framework Julian Fraillon, John Ainley, Wolfram Schulz, Daniel Duckworth, Tim Friedman, 2019-07-02 This open access book presents the assessment framework for IEA's International Computer and Information Literacy Study ICILS 2018 which is designed to assess how well students are prepared for study work and life in a digital world. The study measures international differences in students' computer and information literacy (CIL), their ability to use computers to investigate, create, participate and communicate at home, at school, in the workplace and in the community. Participating countries also have an option for their students to complete an assessment of computational thinking (CT). The ICILS assessment framework articulates the basic structure of the study, providing a description of the field and the constructs to be measured. This book outlines the design and content of the measurement instruments, sets down the rationale for those designs and describes how measures generated by those instruments relate to the constructs. Hypothesized relations between constructs provide the foundation for some of the analyses that follow. Above all, the framework links ICILS to other similar research, enabling the contents of this assessment framework to combine theory and practice in an explication of both the what and the how of ICILS.

Learning in the Making Jackie Gerstein, 2019-08-27 Making is a dynamic and hands-on learning experience that directly connects with long-established theories of how learning occurs. Although it hasn't been a focus of traditional education or had a prominent place in the classroom, teachers find it an accessible, exciting option for their students. The maker movement brings together diverse communities dedicated to creating things through hands-on projects. Makers represent a growing community of builders and creators: engineers, scientists, artists, DIYers and hobbyists of all ages, interests and skill levels who engage in experimentation and cooperation. Transferring this innovative, collaborative and creative mindset to the classroom is the goal of maker education. A makerspace isn't about the latest tools and equipment. Rather, it's about the learning experiences and opportunities provided to students. Maker education spaces can be as large as a school workshop with high-tech tools (e.g. 3D printers and laser cutters) or as small and low-tech as the corner of a classroom with bins of craft supplies. Ultimately, it's about the mindset, not the stuff. In *Learning in the Making*, Jackie Gerstein helps you plan, execute, facilitate and reflect on maker experiences so both you and your students understand how the knowledge, skills and attitudes of maker education transfer to real-world settings. She also shows how to seamlessly integrate these activities into your curriculum with intention and a clearly defined purpose.

Find the Oval Xist Publishing,2019-02-15 Discover Shapes Level B Reader Find the Oval Beginning readers identify things that are ovals in this very simple 20 page reader Sample Text I see an egg The egg is an oval This book is a step up from the paired book in the Discover Shapes series **OVAL Perspectives on the 'Bilingual Advantage': Challenges and Opportunities** Peter Bright,Roberto Filippi,2019-09-05 The claim that multilanguage acquisition drives advantages in executive function is currently an issue of vigorous debate in academic literature Critics argue that evidence for this advantage has been confounded by unsound or questionable methodological practices with some investigators abandoning research in this area altogether indicating either that there is no bilingual advantage or that it is impossible to capture and therefore rule out alternative explanations for group differences Over the past decade and against this backdrop theory has developed from a relatively narrow focus on inhibitory control to incorporate theory of mind rule based learning reactive and proactive control visuo spatial memory and control of verbal interference in speech comprehension Most recently authors have claimed that the process of becoming bilingual may also impact on metacognitive abilities The fundamental issue is whether the limited capacity and goal directed selectivity of our executive system can somehow be enhanced or otherwise profit from the continuous intense competition associated with communicating in multilingual environments However although this issue has received much attention in academic literature the question of which cognitive mechanisms are most influenced by the enhanced competition associated with multilingual contexts remains unresolved Therefore rather than dismissing this important topic we advocate a more systematic approach in which the effects of multilinguistic experience are assessed and interpreted across well defined stages of cognitive development We encourage a broad developmentally informed approach to plotting the trajectory of interactions between multi language learning and cognitive development using a convergence of neuroimaging and behavioral methods across the whole lifespan Moreover we suggest that the current theoretical framing of the bilingual advantage is simplistic and this issue may limit attempts to identify specific mechanisms most likely to be modulated by multilingual experience For example there is a tendency in academic literature to treat executive function as an essentially unitary fronto parietal system recruited in response to all manner of cognitive demand yet performance across so called executive function tasks is highly variable and intercorrelations are sometimes low It may be the case that some higher level mechanisms of executive function remain relatively unaffected while others are more sensitive to multilingual experience and that there may be disadvantages as well as advantages which themselves may be sensitive to factors such as age In our view there is an urgent need to take a more fine grained approach to this issue so that the strength and direction of changes in diverse cognitive abilities associated with multilanguage acquisition can be better understood This book compiles work from psychologists and neuroscientists who actively research whether how and the extent to which multilanguage acquisition promotes enhanced cognition or protects against age related cognitive or

neurological deterioration We hope this collection encourages future efforts to drive theoretical progress well beyond the highly simplistic issue of whether the bilingual cognitive advantage is real or spurious

India and the Knowledge Economy Carl J. Dahlman, Anuja Utz, 2005-01-01 In the global knowledge economy of the twenty first century India's development policy challenges will require it to use knowledge more effectively to raise the productivity of agriculture industry and services and reduce poverty India has made tremendous strides in its economic and social development in the past two decades Its impressive growth in recent years 8.2 percent in 2003 can be attributed to the far reaching reforms embarked on in 1991 and to opening the economy to global competition In addition India can count on a number of strengths as it strives to transform itself into a knowledge based economy availability of skilled human capital a democratic system widespread use of English macroeconomic stability a dynamic private sector institutions of a free market economy a local market that is one of the largest in the world a well developed financial sector and a broad and diversified science and technology infrastructure and global niches in IT But India can do more much more to leverage its strengths and grasp today's opportunities India and the Knowledge Economy assesses India's progress in becoming a knowledge economy and suggests actions to strengthen the economic and institutional regime develop educated and skilled workers create an efficient innovation system and build a dynamic information infrastructure It highlights that to get the greatest benefits from the knowledge revolution India will need to press on with the economic reform agenda that it put into motion a decade ago and continue to implement the various policy and institutional changes needed to accelerate growth In so doing it will be able to improve its international competitiveness and join the ranks of countries that are making a successful transition to the knowledge economy
