Archaeological Theory Today Ian Hodder, 2014-02-27 Now in a revised and updated second edition this volume provides an authoritative account of the current status of archaeological theory as presented by some of its major exponents and innovators over recent decades It summarizes the latest developments in the field and looks to its future exploring some of the cutting edge ideas at the forefront of the discipline The volume captures the diversity of contemporary archaeological theory Some authors argue for an approach close to the natural sciences others for an engagement with cultural debate about representation of the past Some minimize the relevance of culture to societal change while others see it as central some focus on the contingent and the local others on long term evolution While few practitioners in theoretical archaeology would today argue for a unified disciplinary approach the authors in this volume increasingly see links and convergences between their perspectives The volume also reflects archaeology's new openness to external influences as well as the desire to contribute to wider debates The contributors examine ways in which

archaeological evidence contributes to theories of evolutionary psychology as well as to the social sciences in general where theories of social relationships agency landscape and identity are informed by the long term perspective of archaeology The new edition of Archaeological Theory Today will continue to be essential reading for students and scholars in archaeology and in the social sciences more generally

**Archaeological Prospecting and Remote Sensing** Irwin Scollar,A. Tabbagh,A. Hesse,I. Herzog,1990-11-29 First published in 1990 Archaeological Prospecting and Remote Sensing surveys some of the highly ingenious non destructive methods for detecting and mapping remains of ancient cultures that have vanished from the modern surface Techniques include low level air photography magnetic thermal electric and electromagnetic geophysical prospecting A mathematical analysis of the phenomena and measurements is given together with the techniques for interpretation of results using computerized image processing Archaeological prospecting used with image processing has emerged as a universal tool The aim is to build a visual geographic system available for use by conservationists historians and scientists alike The team of authors comprises an archaeologist two geophysicists and an applied mathematician who have collaborated to produce a book of immense value in this innovative field of study

Barceló, Maurizio Forte, Donald H. Sanders, 2000 Computer Applications and Quantitative Methods in Archaeology CAA      The Meanings of Things I. Hodder, 2013-11-12 This unique and fascinating book concentrates on the varying roles and functions that material culture may play in almost all aspects of the social fabric of a given culture The contributors from Africa Australia and Papua New Guinea India South America the USA and both Eastern and Western Europe provide a rich variety of views and experience in a worldwide perspective Several of the authors focus on essential points of principle and methodology that must be carefully considered before any particular approach to material culture is adopted One of the many fundamental questions posed in the book is whether or not all material culture is equivalent to documents which can be read and interpreted by the outside observer If it is what is the nature of the messages or meanings conveyed in this way The book also questions the extent to which acceptance and subsequent diffusion of a religious belief or symbol may be qualified by the status of the individuals concerned in transmitting the innovation as well as by the stratification of the society involved Several authors deal with works of art and the most effective means of reaching an understanding of their past significance In some chapters semiotics is seen as the most appropriate technique to apply to the decoding of the assumed rules and grammars of material culture expression

**The Domestication of Europe** Ian Hodder, 1991-01-08 The Neolithic saw the spread of the first farmers and the formation of settled villages throughout Europe Traditional archaeology has interpreted these changes in terms of population growth economic pressures and social competition but in *The Domestication of Europe* Ian Hodder works from a new controversial theory focusing instead on the enormous expansion of symbolic evidence from the homes settlements and burials of the period Why do the figurines decorated pottery elaborate houses and burial rituals appear and what is their significance The author argues that the symbolism of the Neolithic must be interpreted if we are to understand adequately the associated social and economic changes He suggests that both in Europe and the Near East a particular set of concepts was central to the origins of farming and a settled mode of life These concepts relate to the house and home termed *domus* and they provided a metaphor and a mechanism for social and economic transformation As the wild was brought in and domesticated through ideas and practices surrounding the *domus* people were brought in and settled into the social and economic group of the village Over the following millennia cultural practices relating to the *domus* continued to change and develop until finally overtaken by a new set of concepts which became socially central based on the warrior the hunter and the wild
