The Carnival of Images Michele Mattelart, Armand Mattelart, 1990-09-21 In creating and developing the new genre of the televised novela a one hour long dramatic serial the Brazilian television industry grew in less than 15 years from an insignificant player in the international market to one of the largest most influential in the world In the first book in English to explore the phenomenon of the telenovela Michele and Armand Mattelart challenge accepted views of the world dominance of United States television and probe the socioeconomic impact of this new genre on a third world country Using the telenovela and its impact on the medium world wide the authors document the important changes in the international circulation of television programs and in the way television is perceived theoretically as a subject of research The book traces the development of the novela in a country that in the early 1960s did not have any nationwide media and later from 1964 to the 1970s was ruled by a military dictatorship It further analyzes the formation of the genre and its mode of production placing the novela s appearance and development in its cultural institutional and economic context The authors look at the peculiar contradictory relation between the genre s creators and developers generally left wing intellectuals and the manipulations required to construct a television industry in a highly competitive marketplace The book begins with a description of the economic institutional and cultural context which produced the genre It explores the world of soap operas the development of a national television industry and the beginnings of an urban consumer society in Brazil The authors include a valuable and detailed study of the mode of production of the telenovela placing both the form and content of the genre in their specific economic and institutional context The book goes on to examine the relationship between the genre and its wider social and cultural

Chapters on Spanish Literature

Fitzmaurice-Kelly,1908 Ovid and the Renaissance in Spain Rudolph Schevill,1916 *Metamorphoses* Emanuele

Coccia,2021-06-09 We are all fascinated by the mystery of metamorphosis of the caterpillar that transforms itself into a butterfly Their bodies have almost nothing in common They don t share the same world one crawls on the ground and the other flutters its wings in the air And yet they are one and the same life Emanuele Coccia argues that metamorphosis the phenomenon that allows the same life to subsist in disparate bodies is the relationship that binds all species together and unites the living with the non living Bacteria viruses fungi plants animals they are all one and the same life Each species including the human species is the metamorphosis of all those that preceded it the same life cobbling together a new body and a new form in order to exist differently And there is no opposition between the living and the non living life is always the reincarnation of the non living a carnival of the telluric substance of a planet the Earth that continually draws new faces and new ways of being out of even the smallest particle of its disparate body By highlighting what joins humans together with other forms of life Coccia s brilliant reflection on metamorphosis encourages us to abandon our view of the human species as static and independent and to recognize instead that we are part of a much larger and interconnected form of life *Debt,*

the IMF, and the World Bank Eric Toussaint,Damien Millet,2010-09-01 Mainstream economists tell us that developing countries will replicate the economic achievements of the rich countries if they implement the correct free market policies But scholars and activists Toussaint and Millet demonstrate that this is patently false Drawing on a wealth of detailed evidence they explain how developed economies have systematically and deliberately exploited the less developed economies by forcing them into unequal trade and political relationships Integral to this arrangement are the international economic institutions ostensibly created to safeguard the stability of the global economy the International Monetary Fund IMF and the World Bank and the imposition of massive foreign debt on poor countries The authors explain in simple language and ample use of graphics the multiple contours of this exploitative system its history and how it continues to function in the present day Ultimately Toussaint and Millet advocate cancellation of all foreign debt for developing countries and provide arguments from a number of perspectives legal economic moral Presented in an accessible and easily referenced question and answer format *Debt the IMF and the World Bank* is an essential tool for the global justice movement **The Postmodernism**

Debate in Latin America John Beverley,Michael Aronna,José Oviedo,1995-05-05 Postmodernism may seem a particularly inappropriate term when used in conjunction with a region that is usually thought of as having only recently and then unevenly acceded to modernity Yet in the last several years the concept has risen to the top of the agenda of cultural and political debate in Latin America This collection explores the Latin American engagement with postmodernism less to present a regional variant of the concept than to situate it in a transnational framework Recognizing that postmodernism in Latin

America can only inaccurately be thought of as having traveled from an advanced capitalist center to arrive at a still dependent neocolonial periphery the contributors share the assumption that postmodernism is itself about the dynamics of interaction between local and metropolitan cultures in a global system in which the center periphery model has begun to break down These essays examine the ways in which postmodernism not only designates the effects of this transnationalism in Latin America but also registers the cultural and political impact on an increasingly simultaneous global culture of a Latin America struggling with its own set of postcolonial contingencies particularly the crisis of its political left the dominance of neoliberal economic models and the new challenges and possibilities opened by democratization With new essays on the dynamics of Brazilian culture the relationship between postmodernism and Latin American feminism postmodernism and imperialism and the implications of postmodernist theory for social policy as well as the text of the Declaration from the Lacandon Jungle of the Zapatatista National Liberation Army this expanded edition of boundary 2 will interest not only Latin Americanists but scholars in all disciplines concerned with theories of the postmodern Contributors Xavier Alb Jos Joaqu n Brunner Fernando Calder n Enrique Dussel N stor Garc a Canclini Mart n Hopenhayn Neil Larsen the Latin American Subaltern Studies Group Norbert Lechner Mar a Milagros L pez Raquel Olea An bal Quijano Nelly Richard Carlos Rinc n Silviano Santiago Beatriz Sarlo Roberto Schwarz and Hern n Vidal

The Spirit Level Richard Wilkinson, Kate Pickett, 2011-05-03 It is common knowledge that in rich societies the poor have worse health and suffer more from almost every social problem This book explains why inequality is the most serious problem societies face today

The Just War in the Middle Ages Frederick H. Russell, 1975-10-16 The first systematic attempt to reconstruct from original manuscript sources and early printed books the medieval doctrines relating to the just war the holy war and the crusade Despite the frequency of wars and armed conflicts throughout the course of western history no comprehensive survey has previously been made of the justifications of warfare that were elaborated by Roman lawyers canon lawyers and theologians in the twelfth and thirteenth century universities After a brief survey of theories of the just war in antiquity with emphasis on Cicero and Augustine and of thought on early medieval warfare the central chapters are devoted to scholastics such as Pope Innocent IV Hostiensis and Thomas Aquinas Professor Russell attempts to correlate theories of the just war with political and intellectual development in the Middle Ages His conclusion evaluates the just war in the light of late medieval and early modern statecraft and poses questions about its compatibility with Christian ethics and its validity within international law

Language and Poetry Jorge Guillén, 1961

Forgiveness Vladimir Jankélévitch, 2005-04 Philosopher Vladimir Jank l vitch has only recently begun to receive his due from the English speaking world thanks in part to discussions of his thought by Jacques Derrida Emmanuel L vinas and Paul Ricoeur His international readers have long valued his unique interdisciplinary approach to philosophy s greatest questions and his highly readable writing style Originally published in 1967 Le Pardon or Forgiveness is one of Jank l vitch s most influential works In it he characterizes the ultimate ethical act of

forgiving as behaving toward the perpetrator as if he or she had never committed the action rather than merely forgetting or rationalizing it a controversial notion when considering events as heinous as the Holocaust Like so many of Jankl vitch's works Forgiveness transcends standard treatments of moral problems not simply generating a treatise on one subject but incorporating discussions of topics such as free will giving creativity and temporality Translator Andrew Kelley masterfully captures Jankl vitch's melodic prose and in a substantive introduction reviews his life and intellectual contributions Forgiveness is an essential part of that legacy and this indispensable English translation provides key tools for understanding one of the great Western philosophers of the twentieth century

Dalí and Film Matthew Gale, 2007 Dali was one of the most famous and also one of the most notorious artists of the 20th century his flamboyant personal style establishing him as a showman in the popular imagination This book presents both the major works that reflect Dali's preoccupation with film and material related to the key film projects on which he worked

The Future of the Classical Salvatore Settis, Allan Cameron, 2006-10-20 Every era has invented a different idea of the classical to create its own identity Thus the classical does not concern only the past it is also concerned with the present and a vision of the future In this elegant new book Salvatore Settis traces the ways in which we have related to our classical past starting with post modern American skyscrapers and working his way back through our cultural history to the attitudes of the Greeks and Romans themselves Settis argues that this obsession with cultural decay ruins and a classical past is specifically European and the product of a collective cultural trauma following the collapse of the Roman Empire This situation differed from that of the Aztec and Inca empires whose collapse was more sudden and more complete and from the Chinese Empire which always enjoyed a high degree of continuity He demonstrates how the idea of the classical has changed over the centuries through an unrelenting decay of classicism and its equally unrelenting rebirth in an altered form In the Modern Era this emulation of the ancients by the moderns was accompanied by new trends the increasing belief that the former had now been surpassed by the latter and an increasing preference for the Greek over the Roman These conflicting interpretations were as much about the future as they were about the past No civilization can invent itself if it does not have other societies in other times and other places to act as benchmarks Settis argues that we will be better equipped to mould new generations for the future once we understand that the classical is not a dead culture we inherited and for which we can take no credit but something startling that has to be re-created every day and is a powerful spur to understanding the other
