**The New Complete Book of Herbs, Spices, and Condiments** Carol Ann Rinzler, 2001 Lists over one hundred herbs spices and condiments providing information on their nutritional profile benefits possible side effects chemical makeup and various uses      *Natural Causes* Dan Hurley, 2007-12-26 A riveting work of investigative journalism that charts the rise of the dietary supplement craze and reveals the dangerous and sometimes deadly side of these highly popular and completely unregulated products Over 60 percent of Americans buy and take herbal and dietary supplements for all sorts of reasons to prevent illness vitamin C to ease depression St John s wort to aid weight loss ephedra to boost the memory ginkgo biloba and even to cure cancer shark cartilage bloodroot despite the fact that few of these natural supplements have been proven to be safe or effective The vitamin and herbal supplement industry generates over 20 billion a year by selling products that

promise to cure or fix but are produced and marketed essentially without oversight And while the media has been quick to sensationalize the benefits of supplements few have taken a hard look at the dangers posed by many of the remedies flooding the market today Award winning journalist Dan Hurley breaks the silence for the first time in *Natural Causes* From the snake oil salesmen of the early twentieth century to rise of the health food movement in the sixties and seventies Hurley charts the remarkable growth of an industry built largely on fraud and reveals the backroom politics that led to the passage of the Dietary Supplement Health and Education Act of 1994 which effectively freed the industry from FDA oversight In unprecedented detail he shows how supplement manufacturers have concealed the truth about dozens of untested treatments and the shocking rise in deaths disfigurements and life threatening injuries caused by products deceptively promoted as safe and natural Most importantly he provides a telling look at why in an age of unprecedented scientific advancement we continue to buy and believe in remedies for which little evidence exists and why the supplements we take to promote our health may be doing far more harm than good As Hurley shows the dietary supplement craze may be one of the greatest swindles ever perpetrated on the American public one that feeds billions of dollars each year into the pockets of lobbyists politicians and any charlatan who wants to slap a label on a bottle and tout it as the next big natural cure Blending hard facts with spellbinding personal stories *Natural Causes* is a must read for anyone who has ever popped a multivitamin or an herb and provides a hard hitting frightening look at a cultural trend that is out of control

*Quackery* Lydia Kang, Nate Pedersen, 2017-10-17 What won't we try in our quest for perfect health beauty and the fountain of youth Well just imagine a time when doctors prescribed morphine for crying infants When liquefied gold was touted as immortality in a glass And when strychnine yes that strychnine the one used in rat poison was dosed like Viagra Looking back with fascination horror and not a little dash of dark knowing humor *Quackery* recounts the lively at times unbelievable history of medical misfires and malpractices Ranging from the merely weird to the outright dangerous here are dozens of outlandish morbidly hilarious treatments conceived by doctors and scientists by spiritualists and snake oil salesmen yes they literally tried to sell snake oil that were predicated on a range of cluelessness trial and error and straight up scams With vintage illustrations photographs and advertisements throughout *Quackery* seamlessly combines macabre humor with science and storytelling to reveal an important and disturbing side of the ever evolving field of medicine
