Extracting Accountability Jessica M. Smith, 2021-09-28 How engineers in the mining and oil and gas industries attempt to reconcile competing domains of public accountability The growing movement toward corporate social responsibility CSR urges corporations to promote the well being of people and the planet rather than the sole pursuit of profit In *Extracting Accountability* Jessica Smith investigates how the public accountability of corporations emerges from the everyday practices of the engineers who work for them Focusing on engineers who view social responsibility as central to their profession she finds the corporate context of their work prompts them to attempt to reconcile competing domains of accountability to formal guidelines standards and policies to professional ideals to the public and to themselves Their efforts are complicated by the distributed agency they experience as corporate actors they are not always authors of their actions and frequently act through others Drawing on extensive interviews archival research and fieldwork Smith traces the ways that engineers in the mining and oil and gas industries accounted for their actions to multiple publics from critics of their industry to their own friends and families She shows how the social license to operate and an underlying pragmatism lead engineers to ask how resource production can be done responsibly rather than whether it should be done at all She analyzes the liminality of engineering consultants who experienced greater professional autonomy but often felt hamstrung when positioned as outsiders Finally she explores how critical participation in engineering education can nurture new accountabilities and chart more sustainable resource futures

High Stakes Accountability Jennifer King Rice, Christopher Roellke, 2009-01-01 In this third volume of *Research in Education Fiscal Policy and Practice* editors Jennifer King Rice and Christopher Roellke have assembled a diversity of research studies focused on the current policy environment of high stakes accountability and how this context has impacted educators and students at multiple levels of the system This effort to leverage student performance through high stakes reform has accelerated and intensified considerably since the 2002 reauthorization of the federal Elementary and Secondary Education Act commonly referred to as No Child Left Behind NCLB In order for high stakes accountability reforms to realize their stated aims targeted schools must have or acquire the resources and capacity to meet prescribed performance standards Hess 1999 Malen Mintrop 2003 2004 Wong et al 1999 yet little systematic research has been assembled to document the implications of high stakes accountability systems on the resources and capacity of schools and school systems This book aims to fill that gap With this in mind authors were asked to pay specific attention to challenges school systems confront as a result of NCLB and other high stakes reforms The contributing authors were asked to think of policymakers and practitioners at local state and national levels as the intended audiences for their work Our contributors responded with a collection of studies examining the relationship between high stakes reform and school district staffing the recruitment and distribution of high quality teachers curriculum making and the provision of supplemental

educational services to children Our book is organized into three sections The first provides a framework for assessing the impact of high stakes accountability policy on school capacity and also addresses implementation challenges at both state and local levels The second section focuses on the impact of federal and state policymaking on teacher staffing and workplace conditions The final section includes three chapters that provide a range of critiques on federal policymaking including legal challenges to NCLB

The Theory of Accountability Sam Silverstein,2021-09-21 E mc2 You may think you know what this familiar formula means but until you read Sam Silverstein s breakthrough book you will not know its true power or its potential This is the Accountability Formula and it forms the heart of the Theory of Accountability Silverstein s Theory of Accountability has nothing to do with physics the speed of light or the relationship between space and time It has everything to do with personal and organizational growth and with establishing the kind of leadership in your own life that makes excuses a thing of the past and inspires true commitment from others The Theory of Accountability states Our lived EXPERIENCE is the direct result of our MINDSET and our COMMITMENT SQUARED Silverstein s new book examines each of these critical elements in depth and shows you how to leverage the power of accountability to create a sustainable high performance life and organization E stands for Experience Our experience is the results the outcomes we achieve in our life in our business and everywhere else It is what we produce Our experience impacts the lives of everyone we come in contact with The problem is all too often our experience is erratic random unplanned and dysfunctional with results to match M stands for Mindset The accountable mindset is based on a conscious decision to embrace possibility rather than fear When decisions are driven by fear our experience and the experience of everyone we come in contact with suffers On the other hand when decisions are driven by a set of beliefs that are based on valuing people and on a foundation of abundance rather than scarcity our experience improves C2 stands for Commitment Squared How do we ensure that our mindset is driven by possibility and abundance rather than by fear and scarcity By focusing on our ability to make keep and expand specific commitments There is truly awesome power in commitment The quality of the results you achieve is always based on two things how committed you are to people and how committed you are to your mindset and your core beliefs These are the two commitments of the accountable person When both kinds of commitments are in full play when you are all in you are living to your full potential Such commitments are like compound interest because they produce increasingly greater results over time Sam s latest book offers leaders a proven system for taking control of your life and transforming yourself and your organization by harnessing the awesome power of accountability

Reclaiming Accountability Heidi Kitrosser,2015-01-06
Americans tend to believe in government that is transparent and accountable Those who govern us work for us and therefore they must also answer to us But how do we reconcile calls for greater accountability with the competing need for secrecy especially in matters of national security Those two imperatives are usually taken to be antithetical but Heidi Kitrosser argues convincingly that this is not the case and that our concern ought to lie not with secrecy but with the sort of unchecked secrecy that can result from presidentialism or constitutional arguments for broad executive control of information In Reclaiming Accountability Kitrosser traces presidentialism from its start as part of a decades old legal movement through its appearance during the Bush and Obama administrations demonstrating its effects on secrecy throughout Taking readers through the key presidentialist arguments including supremacy and unitary executive theory she explains how these arguments misread the Constitution in a way that is profoundly at odds with democratic principles Kitrosser s own reading offers a powerful corrective showing how the Constitution provides myriad tools including the power of Congress and the courts to enforce checks on presidential power through which we could reclaim government accountability
