Accounting in China in Transition, 1949-2000 Allen Huang, Ronald Ma, 2001 The history of the People's Republic of China can be classified into two distinctive periods Mao's China 1949-1978 and Deng's China from 1979 to the present Each period contains a number of sub periods or phases and each phase is characterised by one or more major political or economic events This book gives an outline of the major events and the associated accounting changes over time During the period of Mao's rule China experienced two violent political mass movements which inflicted great suffering on the nation There were few accounting developments in this period In contrast Deng's China set itself the ambitious task of transforming the centrally planned and centrally controlled economy into a market economy with Chinese characteristics There has been an accompanying development in Chinese accounting in which its key role of serving the Government's planning and control needs is transformed into serving the information needs of decision makers in the market place The economic reform in Deng's China has made considerable progress which is particularly evident in the urban and coastal regions The transition from a planned economy to a market economy is incomplete and certain vexatious problems have yet to be resolved The resolution of the state owned enterprise reform issues will set a precedent for the further reform of Chinese accounting Contents Brief History of Accounting in China up to 1949 Accounting in Mao's China Establishment Phase 1949-1957 Great Leap Forward 1958-1962 Recovery Phase 1963-1965 Cultural Revolution 1966-1978 Accounting in Deng's China Political Scene in Deng's China Initial Economic Reform 1978-1984 Planned Commodity Economy 1984-1991 Socialist Market Economy Since 1992 Towards a Successful Outcome for SOE Reform Readership Undergraduate and graduate students academics businessmen and readers with an interest in Asian economic and financial affairs

Accounting in China in Transition, 1949-2000 Allen Huang, Ronald Ma, 2001 The history of the People's Republic of China can be classified into two periods Mao's China and Deng's China Each period contains a number of phases each phase is characterised by political or economic events This book gives an outline of these events and the associated accounting changes

Corporate Governance and China's H-share Market Alice De Jonge, 2008-01-01 Using detailed case studies of the first nine mainland Chinese companies to be listed on the Hong Kong stock exchange 1993-94 Alice de Jonge examines the evolution of corporate governance law and culture in China's H share market A story emerges not of tensions between ideas of corporate governance from two different legal systems Hong Kong vs mainland Chinese nor about legal convergence as China adopts concepts from Anglo American jurisdictions Rather it is a story of individual firms being pragmatic in mediating the different agendas of state agencies that own or control them Corporate Governance and China's H Share Market looks at corporate governance in a cross border context is unique in providing a detailed understanding of China's H share market reveals why a beer company was the first ever Chinese firm to be listed overseas This fascinating work will appeal to postgraduate students and scholars of corporate governance Asian law and legal systems and Asian

business as well as Chinese scholars more generally Professionals such as law practitioners working in Chinese law will also find the book of interest **Journal of Economic Literature** ,2002 Thoughts on Economic Development in China Ma Ying,Ying Ma,Hans-Michael Trautwein,2013 This book is about mutual influences of thinking about economic development in China and in the West from the 18th century until the present Its chapters are contributed by development economists and historians of thought from China and other parts of the world The book describes important stages in the evolution cross fertilization and contextual modification of ideas about economic order development and institutional change It illustrates how Western concepts and theories have been adopted and adapted to Chinese conditions in different waves of modernization from the late 19th century until the present and that this was and is no one way traffic The book describes how pre classical thinking in the West in particular French Physiocracy in mid 18th century was influenced by China as an ideal and a source of ideas at a time when China was the largest and most advanced economy in the world It discusses to what extent concepts of Western style economics in particular in the fields of development economics and institutional economics can be used to understand the rapid transitions and developments of the Chinese economy in recent decades and to what extent they might need to be modified in the light of new experiences and insights Against this background several contributions to the volume provide assessments of the current state of economic science and teaching in China in particular with regard to Chinese views on Western economics The book should be of interest to those who are interested in economic development and the history of economics in China **China's Financial System** Franklin Allen,Jun Qian,Xian Gu,2015-11-18 Provides a review of China s financial system and compares it to other financial systems It reviews what has worked and what has not within the markets and intermediaries in China the effects of the recent development of China s financial system on the economy and a non standard financial sector operating beyond the markets and banking sectors

China's Economic Rise Congressional Research Service,2017-09-17 Prior to the initiation of economic reforms and trade liberalization 36 years ago China maintained policies that kept the economy very poor stagnant centrally controlled vastly inefficient and relatively isolated from the global economy Since opening up to foreign trade and investment and implementing free market reforms in 1979 China has been among the world s fastest growing economies with real annual gross domestic product GDP growth averaging nearly 10% through 2016 In recent years China has emerged as a major global economic power It is now the world s largest economy on a purchasing power parity basis manufacturer merchandise trader and holder of foreign exchange reserves The global economic crisis that began in 2008 greatly affected China s economy China s exports imports and foreign direct investment FDI inflows declined GDP growth slowed and millions of Chinese workers reportedly lost their jobs The Chinese government responded by implementing a 586 billion economic stimulus package and loosening monetary policies to increase bank lending Such policies enabled China to effectively weather the effects of the sharp global fall in demand for Chinese products but may have contributed to overcapacity in

several industries and increased debt by Chinese firms and local government China's economy has slowed in recent years Real GDP growth has slowed in each of the past six years dropping from 10.6% in 2010 to 6.7% in 2016 and is projected to slow to 5.7% by 2022 The Chinese government has attempted to steer the economy to a new normal of slower but more stable and sustainable economic growth Yet concerns have deepened in recent years over the health of the Chinese economy On August 11 2015 the Chinese government announced that the daily reference rate of the renminbi RMB would become more market oriented Over the next three days the RMB depreciated against the dollar and led to charges that China's goal was to boost exports to help stimulate the economy which some suspect is in worse shape than indicated by official Chinese economic statistics Concerns over the state of the Chinese economy appear to have often contributed to volatility in global stock indexes in recent years The ability of China to maintain a rapidly growing economy in the long run will likely depend largely on the ability of the Chinese government to implement comprehensive economic reforms that more quickly hasten China's transition to a free market economy rebalance the Chinese economy by making consumer demand rather than exporting and fixed investment the main engine of economic growth boost productivity and innovation address growing income disparities and enhance environmental protection The Chinese government has acknowledged that its current economic growth model needs to be altered and has announced several initiatives to address various economic challenges In November 2013 the Communist Party of China held the Third Plenum of its 18th Party Congress which outlined a number of broad policy reforms to boost competition and economic efficiency For example the communique stated that the market would now play a decisive role in allocating resources in the economy At the same time however the communique emphasized the continued important role of the state sector in China's economy In addition many foreign firms have complained that the business climate in China has worsened in recent years Thus it remains unclear how committed the Chinese government is to implementing new comprehensive economic reforms China's economic rise has significant implications for the United States and hence is of major interest to Congress This report provides background on China's economic rise describes its current economic structure identifies the challenges China faces to maintain economic growth and discusses the challenges opportunities and implications of China's economic rise

Eurasian Economies in Transition E. Ayşen Hiç Gencer, Selahattin Sarı, İlyas Sözen, 2016-12-14 This book explores the economic environment in Eurasian countries particularly investigating the transition economies in Asia Central Asia and the former Soviet socialist bloc countries It analyses the region from the perspective of globalisation and economic integration economic growth and development international trade and finance and the energy and natural resources sectors The second book in a series based on selected papers from the International Conference on Eurasian Economies it will appeal to anyone who is interested in economies of the region their transition processes towards a market economy regime and their integration into the global world

Making Of An Economic Superpower, The: Unlocking China's Secret Of Rapid Industrialization Yi

Wen,2016-05-13 The rise of China is no doubt one of the most important events in world economic history since the Industrial Revolution Mainstream economics especially the institutional theory of economic development based on a dichotomy of extractive vs inclusive political institutions is highly inadequate in explaining China's rise This book argues that only a radical reinterpretation of the history of the Industrial Revolution and the rise of the West as incorrectly portrayed by the institutional theory can fully explain China's growth miracle and why the determined rise of China is unstoppable despite its current backward financial system and political institutions Conversely China's spectacular and rapid transformation from an impoverished agrarian society to a formidable industrial superpower sheds considerable light on the fundamental shortcomings of the institutional theory and mainstream blackboard economic models and provides more accurate reevaluations of historical episodes such as Africa's enduring poverty trap despite radical political and economic reforms Latin America's lost decades and frequent debt crises 19th century Europe's great escape from the Malthusian trap and the Industrial Revolution itself

China's Growth and Integration Into the World Economy Eswar Prasad,2004-06-17 China's transformation into a dynamic private sector led economy and its integration into the world economy have been among the most dramatic global economic developments of recent decades This paper provides an overview of some of the key aspects of recent developments in China's macroeconomy and economic structure It also surveys the main policy challenges that will need to be addressed for China to maintain sustained high growth and continued global integration

Interpreting China's Grand Strategy Michael D. Swaine,Sara A. Daly,Peter W. Greenwood,2000-03-22 China's continuing rapid economic growth and expanding involvement in global affairs pose major implications for the power structure of the international system To more accurately and fully assess the significance of China's emergence for the United States and the global community it is necessary to gain a more complete understanding of Chinese security thought and behavior This study addresses such questions as What are China's most fundamental national security objectives How has the Chinese state employed force and diplomacy in the pursuit of these objectives over the centuries What security strategy does China pursue today and how will it evolve in the future The study asserts that Chinese history the behavior of earlier rising powers and the basic structure and logic of international power relations all suggest that although a strong China will likely become more assertive globally this possibility is unlikely to emerge before 2015-2020 at the earliest To handle this situation the study argues that the United States should adopt a policy of realistic engagement with China that combines efforts to pursue cooperation whenever possible to prevent if necessary the acquisition by China of capabilities that would threaten America's core national security interests and to remain prepared to cope with the consequences of a more assertive China

Monetary and Exchange System Reforms in China Mr.Bernard Laurens,Mr.Hassanali Mehran,Mr.Marc Quintyn,Mr.Tom Nordman,1996-09-26 In 1978 China embarked on a gradual but far reaching reform of its economic system This paper focuses on the achievements so far in reforming the financial sector the legal framework for financial transactions the payments system and the monetary policy

and foreign exchange system It also analyzes the tasks ahead to achieve the goals set in these areas for the year 2000

China's Influence and American Interests Larry Diamond, Orville Schell, 2019-08-01 While Americans are generally aware of China's ambitions as a global economic and military superpower few understand just how deeply and assertively that country has already sought to influence American society As the authors of this volume write it is time for a wake up call In documenting the extent of Beijing's expanding influence operations inside the United States they aim to raise awareness of China's efforts to penetrate and sway a range of American institutions state and local governments academic institutions think tanks media and businesses And they highlight other aspects of the propagandistic discourse war waged by the Chinese government and Communist Party leaders that are less expected and more alarming such as their view of Chinese Americans as members of a worldwide Chinese diaspora that owes undefined allegiance to the so called Motherland Featuring ideas and policy proposals from leading China specialists *China's Influence and American Interests* argues that a successful future relationship requires a rebalancing toward greater transparency reciprocity and fairness Throughout the authors also strongly state the importance of avoiding casting aspersions on Chinese and on Chinese Americans who constitute a vital portion of American society But if the United States is to fare well in this increasingly adversarial relationship with China Americans must have a far better sense of that country's ambitions and methods than they do now **China and the**

International System, 1840-1949 David Scott, 2008-11-07 Examines the images hopes and fears that were evoked during China's century long subservience to external powers *China's Grand Strategy* Andrew Scobell, Edmund J. Burke, Cortez A. Cooper III, Sale Lilly, Chad J. R. Ohlandt, Eric Warner, J.D. Williams, 2020-07-27 To explore what extended competition between the United States and China might entail out to 2050 the authors of this report identified and characterized China's grand strategy analyzed its component national strategies diplomacy economics science and technology and military affairs and assessed how successful China might be at implementing these over the next three decades China Urbanizes Shahid Yusuf, Anthony Saich, 2008-01-22 The key challenges facing China in the next two decades derive from the ongoing process of urbanization China's urbanization rate in 2005 was about 43% Over the next 10-15 years it is expected to rise to well over 50% adding an additional 200 million mainly rural migrants to the current urban population of 560 million How China copes with such a large migration flow will strongly influence rural-urban inequality the pace at which urban centers expand their economic performance and the urban environment The growing population will necessitate a big push strategy to maintain a high rate of investment in housing and the urban physical infrastructure and urban services To finance such expansion will require a significant strengthening and diversification of China's financial system Growing cities will greatly increase consumption of energy and water Containing this without at the same time constraining the economic performance of cities or the improvement in the standards of living will call for enlightened policies strategies careful urban planning and significant technological advances This volume identifies the key developments to watch and discusses the policies which

would affect the course as well as the fruitfulness of change *Book Review Index* ,2004 Every 3rd issue is a quarterly cumulation China Ross Garnaut,Ligang Song,1999 **The Demographic Transition** Jean-Claude Chesnais,1992

Demographic transition constitutes one of the most fundamental modern historical changes people live much longer have fewer children and experience higher mobility This book examines the basic mechanisms behind the modernisation of demographic behaviour The author has marshalled an impressive array of statistical material relating to sixty seven countries half of them less developed countries Most of the tables are time series covering many decades and sometimes go back to the nineteenth and even eighteenth centuries The whole sweep of western experience is dealt with here impartially Though technically sophisticated the book also covers issues of interpretation and analysis The author puts forward a number of challenging propositions mortality decrease is shown to necessarily precede fertility and decline so called exceptions being simply false exceptions He shows how the decline of fertility is dependent on important and manifold social transformations The strong connections between international migration and the course of demographic transition are demonstrated as is the fact that less developed countries are following the same general patterns as MDCs There is also discussion of why the theory of demographic transition must include the effect of population changes on the economic progress of society

China's Local Public Finance in Transition Joyce Y. Man,Yu-hung Hong,2011 China's economy has developed rapidly since the economic reforms in 1978 but public finance reforms have proceeded more slowly This book looks at three major policy options addressing the underlying imbalance between revenues and expenditures at the local level in China This is a valuable resource for anyone interested in local fiscal issues in China
