textbook is intended to meet the needs of a first course in accounting information systems at either the undergraduate or
graduate level It may also be used as a review text in second or subsequent courses in this area A primary objective in
writing the seventh edition of the text was to present AIS material that would make students more marketable in today's
accounting environment Recognizing that over 90 percent of accounting systems are licensed rather than internally custom
developed and that the current market demand is for accounting graduates who can install operate and audit such systems
this text represents a new paradigm In contrast to traditional accounting systems textbooks that assume an organization will
develop its own accounting system and therefore emphasize systems development this textbook gives students the
theoretical foundation and skills they will need to conduct a requirements analysis search for a commercial solution and
successfully implement the software package selected In addition to learning the essential AIS concepts you will see much
discussion and many examples of commercial accounting systems software as it is designed and as it should be designed
Another objective in writing this edition was to make the material student friendly Therefore the authors took great care in
directing their words to the students Recognizing that this is their first introduction to accounting systems clear definitions of
terms were included and numerous examples and illustrations were incorporated to explain the material The book consists of
fifteen chapters The first fourteen chapters provide the theoretical and practical foundation for the final chapter on selecting
and implementing AIS software The learning experience will be optimized if all fifteen chapters are covered **Principles

Accounting Information Systems Ulric J. Gelinas, Richard B. Dull, Patrick Wheeler, 2018-09-01 Today's accounting professionals are challenged to identify enterprise risks and provide quality assurance for a company's information systems. ACCOUNTING INFORMATION SYSTEMS 11th International Edition focuses on three critical accounting information systems in use today: enterprise systems, e-Business systems, and controls for maintaining those systems. Students will easily grasp even the most challenging topics as they explore today's most intriguing AIS topics relative to business processes, information technology, strategic management, security, and internal controls. The 11th International Edition provides students with the tools for organizing and managing information to help them succeed and protect the integrity of their employer's information system. Accounting Information Systems, Global Edition MARSHALL B. STEINBART ROMNEY (PAUL J.), Paul J. Steinbart, 2020-07 *Construction Accounting & Financial Management* Stephen Peterson, 2013-10-03 For all courses in construction accounting and construction finance and for courses in engineering economics taught in construction management programs. This book helps construction professionals and construction management students master the principles of financial management and adapt and apply them to the challenge of profitably managing construction companies. It integrates content that has traditionally been taught through separate accounting, finance, and engineering economics texts. Students learn how to account for a construction company's financial resources, how to manage its costs, profits, and cash flows; how to evaluate different sources of funding a company's cash needs; and how to quantitatively analyze financial decisions. Readers gain hands-on experience through 220 example problems and over 390 practice problems, many of them based on situations actually encountered by the author. This edition adds more than 100 new discussion questions and presents financial equations and accounting transactions more visually to support more intuitive learning.
