Shock Waves Stephane Hallegatte, Mook Bangalore, Laura Bonzanigo, Marianne Fay, Tamaro Kane, Ulf Narloch, Julie Rozenberg, David Treguer, Adrien Vogt-Schilb, 2015-11-23 Ending poverty and stabilizing climate change will be two unprecedented global achievements and two major steps toward sustainable development But the two objectives cannot be considered in isolation they need to be jointly tackled through an integrated strategy This report brings together those two objectives and explores how they can more easily be achieved if considered together It examines the potential impact of climate change and climate policies on poverty reduction It also provides guidance on how to create a win win situation so that climate change policies contribute to poverty reduction and poverty reduction policies contribute to climate change

mitigation and resilience building The key finding of the report is that climate change represents a significant obstacle to the sustained eradication of poverty but future impacts on poverty are determined by policy choices rapid inclusive and climate informed development can prevent most short term impacts whereas immediate pro poor emissions reduction policies can drastically limit long term ones

Partnership for the Americas: Western Hemisphere Strategy and U.S. Southern Command James G. Stavridis, Radm James G Stavridis, 2014-02-23 Since its creation in 1963 United States Southern Command has been led by 30 senior officers representing all four of the armed forces None has undertaken his leadership responsibilities with the cultural sensitivity and creativity demonstrated by Admiral Jim Stavridis during his tenure in command Breaking with tradition Admiral Stavridis discarded the customary military model as he organized the Southern Command Headquarters In its place he created an organization designed not to subdue adversaries but instead to build durable and enduring partnerships with friends His observation that it is the business of Southern Command to launch ideas not missiles into the command s area of responsibility gained strategic resonance throughout the Caribbean and Central and South America and at the highest levels in Washington DC

Realising REDD+ Arild Angelsen, 2009-01-01 REDD must be transformational REDD requires broad institutional and governance reforms such as tenure decentralisation and corruption control These reforms will enable departures from business as usual and involve communities and forest users in making and implementing policies that affect them Policies must go beyond forestry REDD strategies must include policies outside the forestry sector narrowly defined such as agriculture and energy and better coordinate across sectors to deal with non forest drivers of deforestation and degradation Performance based payments are key yet limited Payments based on performance directly incentivise and compensate forest owners and users But schemes such as payments for environmental services PES depend on conditions such as secure tenure solid carbon data and transparent governance that are often lacking and take time to change This constraint reinforces the need for broad institutional and policy reforms We must learn from the past Many approaches to REDD now being considered are similar to previous efforts to conserve and better manage forests often with limited success Taking on board lessons learned from past experience will improve the prospects of REDD effectiveness National circumstances and uncertainty must be factored in Different country contexts will create a variety of REDD models with different institutional and policy mixes Uncertainties about the shape of the future global REDD system national readiness and political consensus require flexibility and a phased approach to REDD implementation

The Urban Rail Development Handbook Daniel Pulido, Georges Darido, Ramon Munoz-Raskin, Joanna Moody, 2018-09-11 Cities across the globe are looking to develop affordable environmentally friendly and socially responsible transportation solutions that can meet the accessibility needs of expanding metropolitan populations and support future economic and urban development. When appropriately planned and properly implemented as part of a larger public transportation network, urban rail systems can provide rapid mobility and vital access to city centers from surrounding districts. High performing urban rail services, when carefully approached as development projects, can help enhance quality of life by giving citizens access to employment opportunities, essential services, urban amenities, and neighboring communities. The purpose of this Handbook is to synthesize and disseminate knowledge to inform the planning, implementation, and operations of urban rail projects with a view towards:

- Emphasizing the need for early studies and project planning
- Making projects more sustainable economically, socially, and environmentally
- Improving socioeconomic returns and access to opportunities for users
- Maximizing the value of private participation where appropriate
- Building capacity within project implementing and managing institutions

This Handbook provides experiential advice to tackle the technical, institutional, and financial challenges faced by decision makers considering urban rail projects. It brings together the expertise of World Bank staff and the input of numerous specialists to synthesize international good practices and recommendations that are independent of commercial, financial, political, or other interests. The material presented is intended as an honest broker guide to maximize the impact and manage the challenges of urban rail systems in cities in both developed and developing countries. Rather than identify a single approach, this Handbook acknowledges the complexities and context necessary when approaching an urban rail development by helping to prepare decision makers to ask the right questions, consider the key issues, perform the necessary studies, apply adequate tools, and learn from international good practice all at the right time in the project development process.

Enhancing the Effectiveness of Team Science National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on the Science of Team Science, 2015-07-15 The past half century has witnessed a dramatic increase in the scale and complexity of scientific research. The growing scale of science has been accompanied by a shift toward collaborative research referred to as team science. Scientific research is increasingly conducted by small teams and larger groups rather than individual investigators, but the challenges of collaboration can slow these teams' progress in achieving their scientific goals. How does a team-based approach work, and how can universities and research institutions support teams? Enhancing the Effectiveness of Team Science synthesizes and integrates the available research to provide guidance on assembling the science team, leadership, education, and professional development for science teams and groups. It also examines institutional and organizational structures and policies to support science teams and identifies areas where further

research is needed to help science teams and groups achieve their scientific and translational goals This report offers major public policy recommendations for science research agencies and policymakers as well as recommendations for individual scientists disciplinary associations and research universities Enhancing the Effectiveness of Team Science will be of interest to university research administrators team science leaders science faculty and graduate and postdoctoral students

The State of Food Security and Nutrition in the World 2020 Food and Agriculture Organization of the United Nations ,International Fund for Agricultural Development,World Food Programme,World Health Organization,The United Nations Children's Fund,2020-07-01 Updates for many countries have made it possible to estimate hunger in the world with greater accuracy this year In particular newly accessible data enabled the revision of the entire series of undernourishment estimates for China back to 2000 resulting in a substantial downward shift of the series of the number of undernourished in the world Nevertheless the revision confirms the trend reported in past editions the number of people affected by hunger globally has been slowly on the rise since 2014 The report also shows that the burden of malnutrition in all its forms continues to be a challenge There has been some progress for child stunting low birthweight and exclusive breastfeeding but at a pace that is still too slow Childhood overweight is not improving and adult obesity is on the rise in all regions The report complements the usual assessment of food security and nutrition with projections of what the world may look like in 2030 if trends of the last decade continue Projections show that the world is not on track to achieve Zero Hunger by 2030 and despite some progress most indicators are also not on track to meet global nutrition targets The food security and nutritional status of the most vulnerable population groups is likely to deteriorate further due to the health and socio economic impacts of the COVID 19 pandemic The report puts a spotlight on diet quality as a critical link between food security and nutrition Meeting SDG 2 targets will only be possible if people have enough food to eat and if what they are eating is nutritious and affordable The report also introduces new analysis of the cost and affordability of healthy diets around the world by region and in different development contexts It presents valuations of the health and climate change costs associated with current food consumption patterns as well as the potential cost savings if food consumption patterns were to shift towards healthy diets that include sustainability considerations The report then concludes with a discussion of the policies and strategies to transform food systems to ensure affordable healthy diets as part of the required efforts to end both hunger and all forms of malnutrition
