The new edition has been updated in accordance with ongoing developments in the IASB Framework and reporting and disclosure requirements as a consequence of international harmonisation of accounting standards. The strength of this textbook has always been the balanced approach taken to explain and discuss alternative theories. The new edition continues with this tradition and seeks to make a clearer connection for students studying accounting theory that accounting theory is important and relevant. The Framework of the International Financial Reporting Standards (IFRS) has required significant consolidation and rewriting of chapters. More than ever the focus of this new edition is to provide students with an understanding of the Framework and how accounting information can be interpreted, disclosed and reported in practice. Accounting Theory Jayne Godfrey, Allan Hodgson, Scott Holmes, 2003-07-25 Accounting Theory 5th edition is the new edition of the market leading theory textbook. The 5th edition has been updated to enhance student understanding of the role of accounting theory and the application of accounting theory in the professional environment. Increasingly students have failed to appreciate the relevance of studying accounting theory due to the esoteric nature of the discipline and its lack of any obvious correlation to a discrete accounting process. The new edition addresses this issue and makes the link to industry more clear through chapter vignettes and case studies. The new edition goes further to align the study of accounting theory to the professional environment domestically and internationally. To achieve this the new edition includes an International View vignette in each chapter to profile the international response or thinking on relevant issues. Theory in Action boxes illustrate the chapter material by way of presenting professional examples to build understanding and end of chapter case studies have developed and apply student understanding of the material. The new edition continues to provide the latest research and the most comprehensive discussion of material whilst maintaining its critical perspective.
