says or that the people in leadership don't care but they are no longer close to the raw experience of being a new manager. What's more, most management books are written by experts who lack the memory of first-time failure. In *How Did I Not See This Coming*, Tynan tells the fictional story of Julie, a onetime star producer, to illustrate how a new manager can successfully make the shift from a role without leadership responsibilities to one with them. Along the way, Tynan offers the five basic truths about management, starting with recognizing team values and strengths, truths that can be learned by anyone. You too can be the manager everyone's talking about in a good way because you're the one who figured it out. **Current Index to**

**Journals in Education, Semi-Annual Cumulation, January-June, 1977** Educational Resources Information Center Staff, 1977-09 Valuation Approaches and Metrics Aswath Damodaran, 2005 Valuation lies at the heart of much of what we do in finance, whether it is the study of market efficiency and questions about corporate governance or the comparison of different investment decision rules in capital budgeting. In this paper, we consider the theory and evidence on valuation approaches. We begin by surveying the literature on discounted cash flow valuation models, ranging from the first mentions of the dividend discount model to value stocks to the use of excess return models in more recent years. In the second part of the paper, we examine relative valuation models and, in particular, the use of multiples and comparables in valuation and evaluate whether relative valuation models yield more or less precise estimates of value than discounted cash flow models. In the final part of the paper, we set the stage for further research in valuation by noting the estimation challenges we face as companies globalize and become exposed to risk in multiple countries. **Computerworld**, 2000-01-17 For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide.
