more than a dozen carefully curated datasets some tracking changes in American religion over a long period of time others large enough to allow a statistical deep dive on subgroups such as atheists or agnostics Burge also draws on data that tracks how individuals move in and out of religion over time helping readers to understand what type of people become nones and what factors lead an individual to return to religion This second edition includes substantial updates with new chapters and current statistical and demographic information The Nones gives readers a nuanced accurate and meaningful picture of the growing number of Americans who say that they have no religious affiliation Burge explains how this rise happened who the nones are and what they mean for the future of American religion

Unquenchable Robert Jerome Glennon, 2010-04-19 In the middle of the Mojave Desert Las Vegas casinos use billions of gallons of water for fountains pirate lagoons wave machines and indoor canals Meanwhile the town of Orme Tennessee must truck in water from Alabama because it has literally run out Robert Glennon captures the irony and tragedy of America's water crisis in a book that is both frightening and wickedly comical From manufactured snow for tourists in Atlanta to trillions of gallons of water flushed down the toilet each year *Unquenchable* reveals the heady extravagances and everyday inefficiencies that are sucking the nation dry The looming catastrophe remains hidden as government diverts supplies from one area to another to keep water flowing from the tap But sooner rather than later the shell game has to end And when it does shortages will threaten not only the environment but every aspect of American life we face shuttered power plants and jobless workers decimated fisheries and contaminated drinking water We can't engineer our way out of the problem either with traditional fixes or zany schemes to tow icebergs from Alaska In fact new demands for water particularly the enormous supply needed for ethanol and energy production will only worsen the crisis America must make hard choices and Glennon's answers are fittingly provocative He proposes market based solutions that value water as both a commodity and a fundamental human right One truth runs throughout *Unquenchable* only when we recognize water's worth will we begin to conserve it
