**Roundabouts** Lee August Rodegerdts,National Cooperative Highway Research Program,2010 TRB s National Cooperative Highway Research Program NCHRP Report 672 Roundabouts An Informational Guide Second Edition explores the planning design construction maintenance and operation of roundabouts The report also addresses issues that may be useful in helping to explain the trade offs associated with roundabouts This report updates the U S Federal Highway Administration s Roundabouts An Informational Guide based on experience gained in the United States since that guide was published in 2000 Teaching Engineering, Second Edition Phillip C. Wankat, Frank S. Oreovicz,2015-01-15 The majority of professors have never had a formal course in education and the most common method for learning how to teach is on the job training This represents a challenge for disciplines with ever more complex subject matter and a lost opportunity when new active learning approaches to education are yielding dramatic improvements in student learning and retention This book aims to cover all aspects of teaching engineering and other technical subjects It presents both practical matters and educational theories in a format useful for both new and experienced teachers It is organized to start with specific practical teaching applications and then leads to psychological and educational theories The practical orientation section explains how to develop objectives and then use them to enhance student learning and the theoretical orientation section discusses the theoretical basis for learning teaching and its impact on students Written mainly for PhD students and professors in all areas of engineering the book may be used as a text for graduate level classes and professional workshops or by professionals who wish to read it on their own Although the focus is engineering education most of this book will be useful to teachers in other disciplines Teaching is a complex human activity so it is impossible to develop a formula that guarantees it will be excellent However the methods in this book will help all professors become good teachers while spending less time preparing for the classroom This is a new edition of the well received volume published by McGraw Hill in 1993 It includes an entirely revised section on the Accreditation Board for Engineering and Technology ABET and new sections on the characteristics of great teachers different active learning methods the application of technology in the classroom from clickers to intelligent tutorial systems and how people learn **Crime, Shame and Reintegration** John Braithwaite,1989-03-23 Crime Shame and Reintegration is a contribution to general criminological theory Its approach is as relevant to professional burglary as to episodic delinquency or white collar crime Braithwaite argues that some societies have higher crime rates than others because of their different processes of shaming wrongdoing Shaming can be counterproductive making crime problems worse But when shaming is done within a cultural context of respect for the offender it can be an extraordinarily powerful efficient and just form of social control Braithwaite identifies the social conditions for such successful shaming If his theory is

right radically different criminal justice policies are needed a shift away from punitive social control toward greater emphasis on moralizing social control This book will be of interest not only to criminologists and sociologists but to those in law public administration and politics who are concerned with social policy and social issues

Buzsáki, 2011 Studies of mechanisms in the brain that allow complicated things to happen in a coordinated fashion have produced some of the most spectacular discoveries in neuroscience This book provides eloquent support for the idea that spontaneous neuron activity far from being mere noise is actually the source of our cognitive abilities It takes a fresh look at the coevolution of structure and function in the mammalian brain illustrating how self emerged oscillatory

timing is the brain's fundamental organizer of neuronal information. The small world like connectivity of the cerebral cortex allows for global computation on multiple spatial and temporal scales. The perpetual interactions among the multiple network oscillators keep cortical systems in a highly sensitive metastable state and provide energy efficient synchronizing mechanisms via weak links. In a sequence of cycles Gyrgy Buzsáki guides the reader from the physics of oscillations through neuronal assembly organization to complex cognitive processing and memory storage. His clear fluid writing accessible to any reader with some scientific knowledge is supplemented by extensive footnotes and references that make it just as gratifying and instructive a read for the specialist. The coherent view of a single author who has been at the forefront of research in this exciting field this volume is essential reading for anyone interested in our rapidly evolving understanding of the brain.

**Introduction to Business** Lawrence J. Gitman, Carl McDaniel, Amit Shah, Monique Reece, Linda Koffel, Bethann Talsma, James C. Hyatt, 2024-09-16 Introduction to Business covers the scope and sequence of most introductory business courses. The book provides detailed explanations in the context of core themes such as customer satisfaction, ethics, entrepreneurship, global business, and managing change. Introduction to Business includes hundreds of current business examples from a range of industries and geographic locations which feature a variety of individuals. The outcome is a balanced approach to the theory and application of business concepts with attention to the knowledge and skills necessary for student success in this course and beyond. This is an adaptation of Introduction to Business by OpenStax. You can access the textbook as pdf for free at openstax.org. **Laboratory Life** Bruno Latour, Steve Woolgar, 2013-04-04 This highly original work presents laboratory science in a deliberately skeptical way as an anthropological approach to the culture of the scientist. Drawing on recent work in literary criticism, the authors study how the social world of the laboratory produces papers and other texts and how the scientific vision of reality becomes that set of statements considered for the time being too expensive to change. The book is based on field work done by Bruno Latour in Roger Guillemin's laboratory at the Salk Institute and provides an important link between the sociology of modern sciences and laboratory studies in the history of science.

The Road to Results Linda G. Morra-Imas, Linda G. Morra, Ray C. Rist, 2009 The Road to Results: Designing and Conducting Effective Development Evaluations presents concepts and procedures for evaluation in a development context. It provides procedures and examples on how to set up a monitoring and evaluation system, how to conduct participatory evaluations, and do social mapping, and how to construct a rigorous quasi-experimental design to answer an impact question. The text begins with the context of development evaluation and how it arrived where it is today. It then discusses current issues driving development evaluation such as the Millennium Development Goals and the move from simple project evaluations to the broader understandings of complex evaluations. The topics of implementing Results-based Measurement and Evaluation and constructing a Theory of

Change are emphasized throughout the text Next the authors take the reader down the road to results presenting procedures for evaluating projects programs and policies by using a Design Matrix to help map the process This road includes determining the overall approach formulating questions selecting designs developing data collection instruments choosing a sampling strategy and planning data analysis for qualitative quantitative and mixed method evaluations The book also includes discussions on conducting complex evaluations how to manage evaluations how to present results and ethical behavior including principles standards and guidelines The final chapter discusses the future of development evaluation This comprehensive text is an essential tool for those involved in development evaluation *Green Logistics* Alan
