Low Vision Rehabilitation Mitchell Scheiman, Maxine Scheiman, Steven Whittaker, 2007 Presents an emerging model in which occupational therapists practice as part of a team of vision rehabilitation professionals serving adults with low vision Occupational therapists offer a unique contribution to the vision rehabilitation team with a focus on meaningful occupational goals the incorporation of occupation into therapy and the orchestration of environmental social and non visual personal factors into a treatment plan The authors have developed a practical and straightforward text outlining an evaluation approach to interventions that focus on recovering occupational performance in adults

Point-of-care testing Peter Lippa, Ralf Junker, 2018-07-18 The underlying technology and the range of test parameters available are evolving rapidly The primary advantage of POCT is the convenience of performing the test close to the patient and the speed at which test results can be obtained compared to sending a sample to a laboratory and waiting for results to be returned Thus a series of clinical applications are possible that can shorten the time for clinical decision making about additional testing or therapy as delays are no longer caused by preparation of clinical samples transport and central laboratory analysis Tests in a POC format can now be found for many medical disciplines including endocrinology diabetes cardiology nephrology critical care fertility hematology coagulation infectious disease and microbiology and general health screening Point of care testing POCT enables health care personnel to perform clinical laboratory testing near the patient The idea of conventional and

POCT laboratory services presiding within a hospital seems contradictory yet they are in fact complementary together POCT and central laboratory are important for the optimal functioning of diagnostic processes They complement each other provided that a dedicated POCT coordination integrates the quality assurance of POCT into the overall quality management system of the central laboratory The motivation of the third edition of the POCT book from Lippa Junker which is now also available in English is to explore and describe clinically relevant analytical techniques organizational concepts for application and future perspectives of POCT From descriptions of the opportunities that POCT can provide to the limitations that clinician s must be cautioned about this book provides an overview of the many aspects that challenge those who choose to implement POCT Technologies clinical applications networking issues and quality regulations are described as well as a survey of future technologies that are on the future horizon The editors have spent considerable efforts to update the book in general and to highlight the latest developments e g novel POCT applications of nucleic acid testing for the rapid identification of infectious agents Of particular note is also that a cross country comparison of POCT quality rules is being described by a team of international experts in this field

Affordable Excellence William A. Haseltine,2013 Today Singapore ranks sixth in the world in healthcare outcomes well ahead of many developed countries including the United States The results are all the more significant as Singapore spends less on healthcare than any other high income country both as measured by fraction of the Gross Domestic Product spent on health and by costs per person Singapore achieves these results at less than one fourth the cost of healthcare in the United States and about half that of Western European countries Government leaders presidents and prime ministers finance ministers and ministers of health policymakers in congress and parliament public health officials responsible for healthcare systems planning finance and operations as well as those working on healthcare issues in universities and think tanks should know how this system works to achieve affordable excellence Publisher s website
