Enhancing the Resilience of the Nation's Electricity System National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Board on Energy and Environmental Systems, Committee on Enhancing the Resilience of the Nation's Electric Power Transmission and Distribution System, 2017-10-25 Americans safety productivity comfort and convenience depend on the reliable supply of electric power The electric power system is a complex cyber physical system composed of a network of millions of components spread out across the continent These components are owned operated and regulated by thousands of different entities Power system operators work hard to assure safe and reliable service but large outages occasionally happen Given the nature of the system there is simply no way that outages can be completely avoided no matter how much time and money is devoted to such an effort The system's reliability and resilience can be improved but never made perfect Thus system owners operators and regulators must prioritize their investments based on potential benefits Enhancing the Resilience of the Nation's Electricity System focuses on identifying developing and implementing strategies to increase the power system's resilience in the face of events that can cause large area long duration outages blackouts that extend over multiple service areas and last several days or longer Resilience is not just about lessening the likelihood that these outages will occur It is also about limiting the scope and impact of outages when they do occur restoring power rapidly afterwards and learning from these experiences to better deal with events in the future

Statistical Postprocessing of Ensemble Forecasts Stéphane Vannitsem, Daniel S. Wilks, Jakob Messner, 2018-05-17 Statistical Postprocessing of Ensemble Forecasts brings together chapters contributed by international subject matter experts describing the current state of the art in the statistical postprocessing of ensemble forecasts The book illustrates the use of these methods in several important applications including weather hydrological and climate forecasts and renewable energy forecasting After an introductory section on

ensemble forecasts and prediction systems the second section of the book is devoted to exposition of the methods available for statistical postprocessing of ensemble forecasts univariate and multivariate ensemble postprocessing are first reviewed by Wilks Chapters 3 then Schefzik and Mller Chapter 4 and the more specialized perspective necessary for postprocessing forecasts for extremes is presented by Friederichs Wahl and Buschow Chapter 5 The second section concludes with a discussion of forecast verification methods devised specifically for evaluation of ensemble forecasts Chapter 6 by Thorarinsdottir and Schuhen The third section of this book is devoted to applications of ensemble postprocessing Practical aspects of ensemble postprocessing are first detailed in Chapter 7 Hamill including an extended and illustrative case study Chapters 8 Hemri 9 Pinson and Messner and 10 Van Schaeybroeck and Vannitsem discuss ensemble postprocessing specifically for hydrological applications postprocessing in support of renewable energy applications and postprocessing of long range forecasts from months to decades Finally Chapter 11 Messner provides a guide to the ensemble postprocessing software available in the R programming language which should greatly help readers implement many of the ideas presented in this book Edited by three experts with strong and complementary expertise in statistical postprocessing of ensemble forecasts this book assesses the new and rapidly developing field of ensemble forecast postprocessing as an extension of the use of statistical corrections to traditional deterministic forecasts Statistical Postprocessing of Ensemble Forecasts is an essential resource for researchers operational practitioners and students in weather seasonal and climate forecasting as well as users of such forecasts in fields involving renewable energy conventional energy hydrology environmental engineering and agriculture Consolidates for the first time the methodologies and applications of ensemble forecasts in one succinct place Provides real world examples of methods used to formulate forecasts Presents the tools needed to make the best use of multiple model forecasts in a timely and efficient manner

Climate Impacts on Energy Systems Jane O. Ebinger, 2011

While the energy sector is a primary target of efforts to arrest and reverse the growth of greenhouse gas emissions and lower the carbon footprint of development it is also expected to be increasingly affected by unavoidable climate consequences from the damage already induced in the biosphere Energy services and resources as well as seasonal demand will be increasingly affected by changing trends increasing variability greater extremes and large inter annual variations in climate parameters in some regions All evidence suggests that adaptation is not an optional add on but an essential reckoning on par with other business risks Existing energy infrastructure new infrastructure and future planning need to consider emerging climate conditions and impacts on design construction operation and maintenance Integrated risk based planning processes will be critical to address the climate change impacts and harmonize actions within and across sectors Also awareness knowledge and capacity impede mainstreaming of climate adaptation into the energy sector However the formal knowledge base is still nascent information needs are complex and to a certain extent regionally and sector specific This report provides an up to date compendium of what is known about weather variability and projected climate trends and their impacts on energy

service provision and demand It discusses emerging practices and tools for managing these impacts and integrating climate considerations into planning processes and operational practices in an environment of uncertainty It focuses on energy sector adaptation rather than mitigation which is not discussed in this report This report draws largely on available scientific and peer reviewed literature in the public domain and takes the perspective of the developing world to the extent possible
