Red Hot Lies Christopher C.

Horner,2008-11-11 Liars Al Gore the United Nations the New York Times The global warming lobby relentless in its push for bigger government more spending and more regulation will use any means necessary to scare you out of your wits as well as your tax dollars and your liberties with threats of rising oceans deadly droughts and unspeakable future consequences of climate change In pursuing their anti energy anti capitalist and pro government agenda the global warming alarmists and unscrupulous scientists who see this scare as their gravy train to federal grants and foundation money resort to dirty tricks smear campaigns and outright lies abandoning scientific standards journalistic integrity and the old fashioned notions of free speech and open debate In Red Hot Lies bestselling author Christopher Horner himself the target of Greenpeace dirty tricks and alarmist smears exposes the dark underbelly of the environmental movement Power hungry politicians blacklist scientists who reject global warming alarmism U S senators threaten companies that fund climate change dissenters Mainstream media outlets openly reject the notion of balance The occasional unguarded scientist candidly admits the need to twist the facts to paint an uglier picture in order to keep the faucet of government money flowing In the name of saving the planet anything goes But why the nasty tactics Why the cover ups lies and intimidation Because Al Gore and his ilk want to use big government at the local state federal and global level to run your life and they can brook no opposition But the actual facts as Red Hot Lies makes clear aren't nearly as scary as their fiction **Frank Porter Graham** William A.

Link,2021-10-14 Frank Porter Graham 1886 1972 was one of the most consequential white southerners of the twentieth century Born in Fayetteville and raised in Charlotte Graham became an active and popular student leader at the University of North Carolina After earning a graduate degree from Columbia University and serving as a marine during World War I he taught history at UNC and in 1930 he became the university's fifteenth president Affectionately known as Dr Frank Graham spent two decades overseeing UNC's development into a world class public institution But he regularly faced controversy especially as he was increasingly drawn into national leadership on matters such as intellectual freedom and the rights of workers As a southern liberal Graham became a prominent New Dealer and negotiator and briefly a U S senator Graham's reputation for problem solving through compromise led him into service under several presidents as a United Nations mediator and he was outspoken as a white southerner regarding civil rights Brimming with fresh insights this definitive biography reveals how a personally modest public servant took his place on the national and world stage and along the way helped transform North Carolina Statistical Postprocessing of Ensemble Forecasts Stéphane Vannitsem, Daniel S.

Wilks, Jakob Messner,2018-05-17 Statistical Postprocessing of Ensemble Forecasts brings together chapters contributed by international subject matter experts describing the current state of the art in the statistical postprocessing of ensemble forecasts The book illustrates the use of these methods in several important applications including weather hydrological and climate forecasts and renewable energy forecasting After an introductory section on ensemble forecasts and prediction systems the second section of the book is devoted to exposition of the methods available for statistical postprocessing of

ensemble forecasts univariate and multivariate ensemble postprocessing are first reviewed by Wilks Chapters 3 then Schefzik and Mller Chapter 4 and the more specialized perspective necessary for postprocessing forecasts for extremes is presented by Friederichs Wahl and Buschow Chapter 5 The second section concludes with a discussion of forecast verification methods devised specifically for evaluation of ensemble forecasts Chapter 6 by Thorarinsdottir and Schuhen The third section of this book is devoted to applications of ensemble postprocessing Practical aspects of ensemble postprocessing are first detailed in Chapter 7 Hamill including an extended and illustrative case study Chapters 8 Hemri 9 Pinson and Messner and 10 Van Schaeybroeck and Vannitsem discuss ensemble postprocessing specifically for hydrological applications postprocessing in support of renewable energy applications and postprocessing of long range forecasts from months to decades Finally Chapter 11 Messner provides a guide to the ensemble postprocessing software available in the R programming language which should greatly help readers implement many of the ideas presented in this book Edited by three experts with strong and complementary expertise in statistical postprocessing of ensemble forecasts this book assesses the new and rapidly developing field of ensemble forecast postprocessing as an extension of the use of statistical corrections to traditional deterministic forecasts Statistical Postprocessing of Ensemble Forecasts is an essential resource for researchers operational practitioners and students in weather seasonal and climate forecasting as well as users of such forecasts in fields involving renewable energy conventional energy hydrology environmental engineering and agriculture Consolidates for the first time the methodologies and applications of ensemble forecasts in one succinct place Provides real world examples of methods used to formulate forecasts Presents the tools needed to make the best use of multiple model forecasts in a timely and efficient manner

Preference Data for Environmental Valuation John Whitehead, Tim Haab, Ju-Chin Huang, 2012-03-15 The monetary valuation of environmental goods and services has evolved from a fringe field of study in the late 1970s and early 1980s to a primary focus of environmental economists over the past decade Despite its rapid growth practitioners of valuation techniques often find themselves defending their practices to both users of the results

of applied studies and perhaps more troubling to other practitioners One of the more heated threads of this internal debate over valuation techniques revolves around the types of data to use in performing a valuation study In the infant years of the development of valuation techniques two schools of thought emerged the revealed preference school and the stated preference school the latter of which is perhaps most associated with the contingent valuation method In the midst of this debate an exciting new approach to non market valuation was developed in the 1990s a combination and joint estimation of revealed preference and stated preference data There are two primary objectives for this book One objective is to fill a gap in the nonmarket valuation primer literature A number of books have appeared over the past decade that develop the theory and methods of nonmarket valuation but each takes an individual nonmarket valuation method approach This book considers each of these valuation methods in combination with another method These relationships can be exploited econometrically to obtain more valid and reliable estimates of willingness to pay relative to the individual methods The second objective is to showcase recent and novel applications of data combination and joint estimation via a set of original state of the art studies that are contributed by leading researchers in the field This book will be accessible to economists and consultants working in business or government as well as an invaluable resource for researchers and students alike
