COVID-19 Pandemic - Philosophical Approaches Nicolae Sfetcu, The paper

begins with a retrospective of the debates on the origin of life the virus or the cell The virus needs a cell for replication instead the cell is a more evolved form on the evolutionary scale of life In addition the study of viruses raises pressing conceptual and philosophical questions about their nature their classification and their place in the biological world The subject of pandemics is approached starting from the existentialism of Albert Camus and Sartre the replacement of the exclusion ritual with the disciplinary mechanism of Michel Foucault and about the Gaia hypothesis developed by James Lovelock and supported in the current pandemic by Bruno Latour The social dimensions of pandemics their connection to global warming which has led to an increase in infectious diseases and the deforestation of large areas which have caused viruses to migrate from their native area their reservoir are highlighted below The ethics of pandemics is approached from several philosophical points of view of which the most important in a crisis of such global dimensions is utilitarianism which involves maximizing benefits for society in direct conflict with the usual Kantian view of respect for people as individuals After a retrospective of the COVID 19 virus that caused the current pandemic its life cycle and its history with an emphasis on the philosophy of death the concept of biopower initially developed by Foucault is discussed with reference to the practice of modern states of control of the populations and the debate generated by Giorgio Agamben who states that what is manifested in this pandemic is the growing tendency to use the state of emergency as a normal paradigm of government An interesting and much debated approach is the one generated by the works of Slavoj i ek who states that the current pandemic has led to the bankruptcy of the current barbaric capitalism wondering if the path that humanity will take is a neo communism Another important negative effect is desocialization with the conclusion of some philosophers that we cannot exist independently of our relationships with others that a person s humanity depends on the humanity of those around him The last section is dedicated to forecasting what the world will look like after the pandemic and there are already signs of a paradigm shift including the sudden disappearance of the wall ideology a cough was enough to make it suddenly impossible to avoid the responsibility that every individual has it towards all living beings for the simple fact that he is part of this world and of the desire to be part of it The whole is always involved in part because everything is in a sense in everything and in nature there are no autonomous regions that are an exception The COVID 19 pandemic seems to restore the supremacy that once belonged to politics One of the virtues of the virus is its ability to generate a more sober idea of freedom to be free means to do what needs to be done in a specific situation

Adams,2015-02-18 A solid and informative biography of one of the overlooked heroes of the Second World War Wall Street Journal Of the leaders of the American Army in World War II Jacob Devers is undoubtedly the forgotten four star Plucked from relative obscurity in the Canal Zone Devers was one of four generals selected by General of the Army George Marshall

in 1941 to assist him in preparing the Army for war He quickly became known in Army circles for his can do attitude and remarkable ability to cut through red tape Among other duties he was instrumental in transforming Ft Bragg then a small Army post into a major training facility As head of the armored force Devers contributed to the development of a faster more heavily armored tank equipped with a higher velocity gun that could stand up to the more powerful German tanks and helped to turn American armor into an effective fighting force In spring 1943 Devers replaced Dwight Eisenhower as commander of the European Theater of Operations then was given command of the 6th Army Group that invaded the south of France and fought its way through France and Germany to the Austrian border In the European campaign to defeat Hitler Eisenhower had three subordinate army group commanders British Field Marshall Bernard Montgomery Omar S Bradley and Jacob Devers The first two are well known here the third receives the attention he properly deserves *National Educational Technology Standards for Students* International Society for Technology in Education,2007 This booklet includes the full text of the ISTE Standards for Students along with the Essential Conditions profiles and scenarios Tornado God Peter J. Thuesen,2020 One of the earliest sources of humanity s religious impulse was severe weather which ancient peoples attributed to the wrath of storm gods Enlightenment thinkers derided such beliefs as superstition but in America scientific and theological hubris came face to face with the tornado nature s most violent windstorm In this groundbreaking history Peter J Thuesen traces the primal connections between weather and religion in the United States He shows that tornadoes and other storms have repeatedly drawn Americans into the profoundest of religious mysteries and confronted them with the question of their own destiny how much is self determined and how much is beyond human understanding or control
