Electronic Commerce and International Private Law Ms Lorna E Gillies, 2013-02-28 Electronic Commerce and

International Private Law examines the maximization of consumer protection via the consumer's jurisdiction and law. It discusses the proposition that a new connecting factor be used to improve the efficiency of juridical protection for consumers who contract with foreign sellers by electronic means and offers recommendations as to how to amend existing jurisdiction and choice of law rules to provide a basis for the consumer to sue in his own jurisdiction and for the law of the consumer's domicile to apply. The book will be a valuable resource for academics, students and practitioners working in the areas of international private law, electronic commerce law and consumer law. *Broadcasting & Cable*, 2008 **If**

Indo-Europeans survive contemporary global crisis? Bogdan Góralski, 2021-05-03. The cosmos and with it the solar system through its physical interaction shapes the fate of the inhabitants of the Earth and their civilization. I have described this in my publications available on OPEN ACCESS on the Internet and in the following book. I confirm it once again. Physicochemical processes including climatic processes of our planet's environment are controlled by the closer and further influence of the space environment. The changing physicochemical environments including climate changes of our planet influencing biological creatures to shape the evolving culture of human civilizations. The defective view of the world promoted in the era of exposing the biological of the human mind contained in the statement being shapes consciousness is supplemented by And consciousness shapes being. The evolution of human knowledge supported recently by information resources stored on the Internet allows us to conclude that the universe is filled with a life shaped by the cosmos and in response the evolution of biological life shapes the cosmic environment. This sentence being shapes consciousness and consciousness shapes being contains my concept of the functioning of the constantly renewing cosmic environment in which the evolution of biological beings is inscribed. The end of the evolution of biological beings is the creation of a virtual environment in which a new star system will be created giving life to a virtual biological environment so that energy can be reproduced. The world is composed of interpenetrating and interacting parallel virtual realities that create the energy resources of the Universe. In the first part of the book entitled *The Solar System shapes the climate of the Earth* 7 I describe how the interactions of the Solar System and the Milky Way shape the Earth's climate and the Earth's lithosphere. In the second part of the book entitled *The civilization results of climate change* 120 I describe how climate change is shaping Earth's cultural systems as human knowledge unfolds. It is necessary to return to the knowledge and beliefs of antiquity to understand the modern world and reconcile different nations. Only peace and reconciliation between people are capable of ensuring the further fruitful evolution of the world. In the last third part of the book entitled *The Third Way between capitalism and communism* 389 I described the actions that need to be taken for the human world to turn into a harmonious environment enabling the realization of the goal of our evolution restoring the energy that gave us life i.e. recreating the virtual solar system and life in it.
