to more people than at any other time in human history This brings an infinite number of opportunities for learning social connection and entertainment But at the same time the origin of information its quality and its veracity are often difficult to assess This volume addresses the issue of credibility the objective and subjective components that make information believable in the contemporary media environment The contributors look particularly at youth audiences and experiences considering the implications of wide access and the questionable credibility of information for youth and learning They discuss such topics as the credibility of health information online how to teach credibility assessment and public policy solutions Much research has been done on credibility and new media but little of it focuses on users younger than college students Digital Media Youth and Credibility fills this gap in the literature Contributors Matthew S Eastin Gunther Eysenbach Brian Hilligoss Frances Jacobson Harris R David Lankes Soo Young Rieh S Shyam Sundar Fred W Weingarten

Disgraceland Jake Brennan, 2019-10-01 From the creator of the popular rock n roll true crime podcast Disgraceland comes an off kilter hysterical at times macabre book inspired by true stories from the highly entertaining underbelly of music history You may know Jerry Lee Lewis married his thirteen year old cousin but did you know he shot his bass player in the chest with a shotgun or that a couple of his wives died under extremely mysterious circumstances Or that Sam Cooke was shot dead in a seedy motel after barging into the manager s office naked to attack her Maybe not Would it change your view of him if you knew that or would your love for his music triumph Real rock stars do truly insane things and invite truly insane things to happen to them murder drug trafficking rape cannibalism and the occult We allow this behavior We are complicit because a rock star behaving badly is what s expected It s baked into the cake Deep down way down past all of our self righteous notions of justice and right and wrong when it comes down to it we want our rock stars to be bad We know the music industry is full of demons ones that drove Elvis Presley Phil Spector Sid Vicious and that consumed the Norwegian Black Metal scene We want to believe in the myths because they re so damn entertaining Disgraceland is a collection of the best of these stories about some of the music world s most beloved stars and their crimes It will mix all new untold stories with expanded stories from the first two seasons of the Disgraceland podcast Using figures we already recognize Disgraceland shines a light into the dark corners of their fame revealing the fine line that separates heroes and villains as well as the danger Americans seek out in their news cycles tabloids reality shows and soap operas At the center of this collection of stories is the ever fascinating music industry a glittery stage populated by gangsters drug dealers pimps groupies with violence scandal and pure unadulterated rock n roll entertainment *Weather on the Air* Robert

Henson, 2013-01-05 From low humor to high drama TV weather reporting has encompassed an enormous range of styles and approaches triggering chuckles infuriating the masses and at times even saving lives In *Weather on the Air* meteorologist and science journalist Robert Henson covers it all the people technology science and show business that combine to deliver the weather to the public each day Featuring the long term drive to professionalize weathercasting the complex relations

between government and private forecasters and the effects of climate change science and the Internet on today's broadcasts. With dozens of photos and anecdotes illuminating the many forces that have shaped weather broadcasts over the years, this engaging study will be an invaluable tool for students of broadcast meteorology and mass communication and an entertaining read for anyone fascinated by the public face of weather.

Severe Local Storms David Atlas, 1963. The objectives of the American Meteorological Society are the development and dissemination of knowledge of meteorology in all its phases and applications and the advancement of its professional ideals. The organization of the Society took place in affiliation with the American Association for the Advancement of Science at Saint Louis, Missouri, December 29, 1919, and its incorporation at Washington, D.C., January 21, 1920. The work of the Society is carried on by the Bulletin, the Journal, and Meteorological Monographs by papers and discussions at meetings of the Society through the offices of the Secretary and the Executive Secretary and by correspondence. All of the Americas are represented in the membership of the Society as well as many foreign countries.

Texas Parks & Wildlife, 2009-07. *Edible Insects and Human Evolution* Julie J. Lesnik, 2019-02-13. Researchers who study ancient human diets tend to focus on meat eating because the practice of butchery is very apparent in the archaeological record. In this volume, Julie Lesnik highlights a different food source: tracing evidence that humans and their hominin ancestors also consumed insects throughout the entire course of human evolution. Lesnik combines primatology, sociocultural anthropology, reproductive physiology, and paleoanthropology to examine the role of insects in the diets of hunter-gatherers and our nonhuman primate cousins. She posits that women would likely spend more time foraging for and eating insects than men, arguing that this pattern is important to note because women are too often ignored in reconstructions of ancient human behavior. Because of the abundance of insects and the low risk of acquiring them, insects were a reliable food source that mothers used to feed their families over the past five million years. Although they are consumed worldwide to this day, insects are not usually considered food in Western societies. Tying together ancient history with our modern lives, Lesnik points out that insects are highly

nutritious and a very sustainable protein alternative She believes that if we accept that edible insects are a part of the human legacy we may have new conversations about what is good to eat both in past diets and for the future of food The Thunderstorm United States.
