Assistive Augmentation Jochen Huber, Roy Shilkrot, Pattie Maes, Suranga Nanayakkara, 2017-11-09 This book addresses Assistive Augmentation highlighting the design and development of assistive technologies user interfaces and interactions that seamlessly integrate with a user's mind, body and behavior providing an enhanced perception. Our senses are the dominant channel we use to perceive the world around us. Whether they have impairments or not, people often find themselves at the limits of their sensorial capabilities. Some seek assistive or enhancing devices that enable them to carry out specific tasks or even transform them into a superhuman with capabilities well beyond the ordinary. The overarching topic of this book revolves around the design and development of technologies and interfaces that provide enhanced physical, sensorial and cognitive capabilities. Assistive Augmentation: The Assistive Augmentation community convened at an interdisciplinary workshop at the 2014 International Conference on Human Factors in Computing Systems (CHI) in Toronto, Canada. The community is comprised of researchers and practitioners who work at the junction of human-computer interaction, assistive technology and human augmentation. This edited volume, which represents the first tangible outcome of the workshop, presents stimulating discussions on the challenges of Assistive Augmentation as examined through case studies. These studies focus on two main areas: 1. Augmented Sensors and Feedback Modalities and 2. Design for Assistive Augmentation.
