Readers and Mythic Signs Debra Moddelmog, 1993 Some literary scholars view myth criticism as passe an approach to literature that enjoyed a heyday in the 1950s and 1960s before being replaced by approaches that are considered to be more theoretically sophisticated and satisfying such as feminism new historicism and deconstruction Moddelmog argues that there are many good reasons not to cast out myth criticism from the community of critical approaches Most obvious among them is that myth has attracted many writers of this century from James Joyce to Thomas Pynchon Virginia Woolf to Flannery O Connor Thomas Mann to Alain Robbe Grillet William Faulkner to Alberto Moravia and that to ignore myth is to dismiss an essential part of their work Moddelmog suggests that by reconstruing the relationship between myth and literature we will find that mythic approaches are frequently not only necessary but also highly stimulating engaging readers in many varieties of questions quests and conclusions Publisher description *Mental Reality* Galen Strawson, 1994 In *Mental Reality* Galen Strawson argues that much contemporary philosophy of mind gives undue primacy of place to publicly observable phenomena nonmental phenomena and behavioral phenomena understood as publicly observable phenomena in its account of the nature of mind It does so at the expense of the phenomena of conscious experience Strawson describes an alternative position naturalized Cartesianism which couples the materialist view that mind is entirely natural and wholly physical with a fully realist account of the nature of conscious experience Naturalized Cartesianism is an adductive as opposed to reductive form of materialism Adductive materialists don t claim that conscious experience is anything less than we ordinarily conceive it to be in being wholly physical They claim instead that the physical is something more than we ordinarily conceive it to be given that many of the wholly physical goings on in the brain constitute literally are conscious experiences as we ordinarily conceive them *Essays in Hegelian Dialectic* Quentin Lauer, 1977 This is a splendid substantial volume Clio **The Creative Cognition Approach** Steven M. The Power of Dialogue Hans-Herbert Kögler,1999 Exemplifying a fruitful fusion of French and German approaches to social theory The Power of Dialogue transforms Jurgen Habermas s version of critical theory into a new critical hermeneutics that builds on both Hans Georg Gadamer s philosophical hermeneutics and Michel Foucault s studies of power and discourse At the book s core is the question of how social power shapes and influences meaning and how the process of interpretation while implicated in social forms of power can nevertheless achieve reflective distance and a critique of power It offers an original perspective on such issues as the impact of prejudice and cultural background on scientific interpretation the need to understand others without assimilating their otherness and the truth of interpretation

The World Trading System John Howard Jackson,1997 Since the first edition of The World Trading System was published in 1989 the Uruguay Round of trade negotiations has been completed and most governments have ratified and are in the process of implementing the General Agreement on Tariffs and Trade GATT In the Uruguay Round more than 120 nations negotiated for over eight years to produce a document of some 26 000 pages This new edition of The World Trading System takes account of these and other developments Like the first edition however its treatment of topical issues is grounded in the fundamental legal constitutional institutional and political realities that mold trade policy Thus the book continues to serve as an introduction to the study of trade law and policy Two basic premises of The World Trading System are that economic concerns are central to foreign affairs and that national economies are growing more interdependent The author presents the economic principles of international trade policy and then examines how they operate under real world constraints In particular he examines the extremely elaborate system of rules that governs international economic relations Until now the bulk of international trade policy has addressed trade in goods issues inadequately addressed by policy include trade in services intellectual property rights certain investment measures and agriculture The author highlights the tension between legal rules designed to create predictability and stability and the governments need to make exceptions to solve short term problems He also looks at weaknesses of international trade policy especially as it applies to developing countries and economies in transition He concludes with a look at issues that will shape international trade policy well into the twenty first century
