The Making of Modern Colombia David Bushnell, 1993-02-09 Colombia's status as the fourth largest nation in Latin America and third most populous as well as its largest exporter of such disparate commodities as emeralds books processed cocaine and cut flowers makes this the first history of Colombia written in English a much needed book It tells the remarkable story of a country that has consistently defied modern Latin American stereotypes a country where military dictators are virtually unknown where the political left is congenitally weak and where urbanization and industrialization have spawned no lasting populist movement There is more to Colombia than the drug trafficking and violence that have recently gripped the world's attention In the face of both cocaine wars and guerrilla conflict the country has maintained steady economic growth as well as a relatively open and democratic government based on a two party system It has also produced an impressive body of art and literature David Bushnell traces the process of state building in Colombia from the struggle for independence territorial consolidation and reform in the nineteenth century to economic development and social and political democratization in the twentieth He also sheds light on the modern history of Latin America as a whole

Warm Beer, Lousy Food John S. Columbia, 2009-12 The line began forming after eight o'clock Sal short and heavy set kept everyone busy Neat in a white shirt and sports jacket with his grey fedora cocked to the side his crooked grin made you smile Without warning the heavy door would swing open and the waiters would come outside to join him They were dressed in pajamas or prison garb with hats and horns and were there to warm up the crowd Some in line expected this others were shocked The pink polka dot building should have been a warning Complete strangers in line became chummy exchanging stories they had heard toilet seat covers to serve drinks on microphones in the ladies room toilet paper for napkins Most had brought their friends there to be roasted The line of people varied in age They all dressed casually because they'd heard you could get a pie in the face or a squirt in the eye The club's routines were blue in color but harmless If you were lucky you

might see a Balls for the Queen or a Singing beer The price was always right for a good time and Warm Beer and Lousy Food was the place to be

Active Listening Carl R. Rogers, Richard Evans Farson, 2021-03-03 *Active Listening* is a short 1957 work by Drs Carl R Rogers and Richard E Farson two influential American psychologists The work brings the counselling technique of active listening to the layperson demonstrating how it can be applied to interactions between an employee and employer Carl R Rogers 1902 1987 was one of the pioneers of the client centered approach to psychotherapy He is considered one of the founding fathers of modern psychotherapy research and is widely regarded among others in the field as the most influential psychotherapist of all time viewed even more highly than Sigmund Freud Dr Rogers served as a professor of psychology at the University of Chicago where he set up the university s counselling and research clinic the Industrial Relations Center He wrote many books on psychotherapy and in later years travelled the world to bring his theories to areas of great political and social strife like Northern Ireland South Africa and Brazil Richard E Farson 1926 2017 had already completed his bachelor s and master s degrees when he met Dr Rogers in 1949 Dr Rogers invited Farson to continue his studies with him at the University of Chicago Farson became Dr Rogers research assistant while he completed his Ph D in psychology and began counselling at the Industrial Relations Center Dr Farson held leadership positions in a number of research institutions He co founded the Western Behavioral Sciences Institute where he served as president and CEO He was later appointed as the founding dean of the California Institute of the Arts School of Design and served as president of the Esalen Institute Drs Rogers and Farson collaborated on many projects including 1957 s *Active Listening* They also led a 16 hour group therapy session that was recorded and released as a film called *Journey Into Self* The film won the 1968 Academy Award for Best Documentary *Active Listening* describes a method of communication used in counselling and conflict resolution Rather than serving as a passive participant in a conversation active listeners take a functional role in helping the speaker to work out their issues As the speaker shares the listener repeats back what they ve heard in their own words This both confirms that they ve heard the speaker and verifies that they understand Unlike the way many of us instinctively communicate trying to

get another to see things from our own perspective active listening requires that we see things from the speaker's perspective The listener must address not only the meaning of the words but also the feeling behind them in order to make the speaker truly feel heard These feelings can be conveyed through words tone volume body language and even breathing This method is not without risks It can be tempting to lose your sense of self in the practice of sensing the feelings of another person As Drs Rogers and Farson put it It takes a great deal of inner security and courage to be able to risk one's self in understanding another In contrast to many psychological texts Active Listening is written for the non-clinician or psychologist In plain everyday language the book explains both the concepts of active listening and how they can be applied to the workplace Employers who engage in active listening the book argues can help employees to become more cooperative less argumentative and clearer in their own communication While the book is written in the context of the employee-employer relationship the technique can be applied to all relationships in our lives The concept is still highly influential and Drs Rogers and Farson's ideas about client-centered psychology are used in clinical practice today

Affective Health and Masculinities in South Africa Hans Reihling, 2020 *Affective Health and Masculinities in South Africa* explores how different masculinities modulate substance use interpersonal violence suicidality and AIDS as well as recovery cross-culturally With a focus on three male protagonists living in very distinct urban areas of Cape Town this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability Through an analysis of masculinities as social assemblages the study shows how affective health problems are tied to modern individualism rather than African tradition that has become a cliché in Eurocentric gender studies Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health Moreover it shows how men change in the face of distress in ways that may look different than global health and gender transformative approaches envision Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences Contributing to current debates on mental health and masculinity the volume will be of interest to scholars from a number of disciplines including anthropology gender studies African studies psychology and global health
